Examples of APA-Style Citations for Inclusion in Whova

SIOp is no longer tracking submission author order, so this is the only place for you to specify author order. This citation will appear in the “Description” of your session in Whova for easy review. Please double-check that it is correct, as it will not be independently verified by SIOp. You do not need to indicate who is in a speaking role; however, please be sure all the names in your citation also appear on the **Co-authors** tab of your submission.
