CONTINUING EDUCATION CREDIT FOR CONFERENCE SESSIONS

SIOP is offering CE credit for attendance at the following five conference sessions: "Introduction to the Generalized Graded Unfolding Model and Its Estimation" (Session 157), "Measuring and Maximizing the ROI of Executive Coaching" (Session 85), "Using Statistical Techniques to Correct Rater Bias in Multisource Ratings" (Session 205), "SIOP Goes to Washington: Advocating for I-O Psychology" (Session 129), and "Media Training Workshop: Preparing for the Media Interview" (Session 55). **Sessions 85 and 205 carry 1.5 hours of CE credit and Sessions 55, 129, and 157 each carry 2 hours of CE credit.** If you are interested in receiving CE credit for attending these sessions, please go to the session and look for the sign where volunteers will help you sign in and out of the session and complete pre- and postsession questionnaires. You must attend the entire session to receive credit. CE letters, which serve as confirmation of attendance at the session, may be requested at the main registration desk before the end of the conference or after the conference by contacting the SIOP Administrative Office.

**A searchable version of this program is available on the SIOP Web site at
www.siop.org/ProgramOnWeb.**

**Plan your conference experience by using the personal conference scheduler,
available at <http://www.siop.org/CONFERENCEPLANNER/MAIN.htm>**

PERSONS WITH DISABILITIES

If you are a person with a disability and require special assistance, please inform the SIOP Administrative Office of any special needs. We will endeavor to meet these special requests. Please notify us as early as possible by calling (419) 353-0032.

**21st Annual SIOP Preconference Workshops
Thursday, May 4, 2006**

Morning Workshops 8:30 AM–12:00 PM

Afternoon Workshops 1:30 PM–5:00 PM

Two workshops, lunch, and a cocktail reception are included in the workshop price.

To attend the following workshops, you must register for two workshop sessions and receive confirmation that you are registered! Please pick up your packet Wednesday from 4 p.m. to 8 p.m. at the SIOP table near hotel registration or Thursday beginning at 6:30 a.m. in the Press Club/Registration Office (2nd floor-H).

1. Defending Minimum Qualifications for E-Applicants and Beyond
2. The I-O Psychologist and the Executive Committee: Lessons From the Front Line
3. High-Impact Leadership Development Systems
4. Driving Business Success Through Understanding and Leveraging Corporate and National Cultures
5. Employment Law: That Was the Year That Was—and What Might Be Next
6. The State-of-the-Art in E-Learning
7. Separating Wheat From Chaff: Interpreting Results From Contemporary Analytic Methods
8. Global Talent Management: An Idea Whose Time Has Come
9. Recent Practical, Methodological, and Statistical Advances in the Detection of Adverse Impact and Test Bias
10. Designing and Implementing Performance Management: Best Practices and Applied Realities
11. Breathing New Life Into Assessment Centers: Leveraging Assessment, Learning, and Technology to Develop Top Talent
12. The Ropes to Learn and the Ropes to Skip: Facilitating Executive On-Boarding
13. Driving Higher Performance Within Your (Internal or External) Consulting Practice
14. Understanding the Financial Context of Organizations: What I-O Psychologists Should Know

**20th Annual SIOP Conference Sunday Seminars
Sunday, May 7, 2006**

9:00 AM–12:00 Noon

To attend one of the following Sunday Seminars, you must register for it and receive confirmation that you have registered!

1. Interdisciplinary Research
2. Strategies for Enhancing the Collection of Internet-Based Data
3. Cutting-Edge Topics in Teams Research
4. Counterproductive Work Behavior: A Scientist–Practitioner Workshop

Other CE Opportunities

There is no extra charge for these sessions. Sessions 85 and 205 carry 1.5 hours of CE credit and Sessions 55, 129, and 157 each carry 2 hours of CE credit.

1. Session 55: Media Training Workshop: Preparing for the Media Interview
2. Session 85: Measuring and Maximizing the ROI of Executive Coaching
3. Session 129: SIOP Goes to Washington: Advocating for I-O Psychology
4. Session 157: Introduction to the Generalized Graded Unfolding Model and Its Estimation
5. Session 205: Using Statistical Techniques to Correct Rater Bias in Multisource Ratings.

Submitted by Robert B. Kaiser, rkaiser@kaplandevries.com

5. Symposium: Friday, 10:30–12:20 Houston B (3rd floor-CC)

Culture and Applicant Perceptions of Selection Procedures

System acceptability across cultures is a key concern of selection designers. The purpose of this symposium is to describe what various selection system designers are doing to unravel the role of culture in applicant reactions to selection tools and what they have found in cross-country differences in tool acceptability.

Ann Marie Ryan, Michigan State University, *Chair*

Submitted by Ann Marie Ryan, ryanan@msu.edu

6. Symposium: Friday, 10:30–11:50 Houston C (3rd floor-CC)

New Directions in Core Self-Evaluations Research

Research on core self-evaluations (CSE; Judge, Locke, & Durham, 1997) has largely focused on the internal validity of the construct. Now an established construct, the next wave of CSE research has begun. The purpose of the current symposium is to highlight new directions in which CSE research can proceed.

Daniel Heller, University of Waterloo, *Chair*
Lance Ferris, University of Waterloo, *Co-Chair*
Charlice Hurst, University of Florida, Timothy A. Judge, University of Florida, Remus Ilies, Michigan State University, *The Benefits and Costs of Positive Core Self-Evaluations*

9. Symposium: Friday, 10:30–12:20 State Room 3 (3rd floor-CC)

On the Front Line at Home: Helping Military Recruiters Cope

In highly competitive recruiting environments, a key aspect of the recruiting process that is often overlooked is the impact of recruiting on the recruiter. Military recruiters are often subjected to punishing working conditions, and in this symposium, research describing how these demands affect personal and organizational outcomes will be presented.

11. Special Event: Friday, 10:30–12:20 Lone Star C1 (2nd floor-CC)

The Making of a Coach

This panel explores how 5 experienced coaches each found their own ways to becoming effective coaches. Starting with training in various fields of psychology or other behavioral sciences and continuing with decisions about careers and work style, the panel discusses how professional, scientific, personal, and commercial factors combine into a practice.

Robin R. Cohen, Bristol-Myers Squibb, *Chair*

Mitchell Karp, Karp Consulting Group, *Panelist*
Anna Marie Valerio, Executive Leadership Strategies
LLC, *Panelist*

Robert J. Lee, Management Consultant, *Discussant*

12. Symposium: Friday, 10:30–12:20 Lone Star C2 (2nd floor-CC)

Impression Management and Faking in the Employment Interview

Although little recent research has explored impression management during the employment interview, there is almost no research that deals with faking during the interview. The present symposium brings together several studies to address the definition of faking in the interview, relationships, and antecedents of impression management and faking.

14. Symposium: Friday, 10:30–12:20 Lone Star C4 (2nd floor-CC)

What Makes a “Great” Leader? Refining the Personality–Leadership Relationship

At present, we know more definitively the overall relevance of personality to predicting leadership outcomes. However, we continue to know comparatively less about which traits are most relevant, when, and why. To address these gaps, this symposium assembles 5 papers that seek to refine our understanding of the personality–leadership relationship.

18. Symposium: Friday, 10:30–11:50 Seminar Theater (2nd floor-H)

Diversity and Intergroup Relations Within Organizations

One of the key questions for our society is how diversity is celebrated as a social asset rather than lamented as a source of prejudice. The aim of this symposium is to assemble cutting-edge empirical and theoretical work that addresses the broad issue of diversity in workgroups.

19. Symposium: Friday, 10:30–11:50 Majestic 1 (37th floor-H)

Resistance to Change: Definitions, Antecedents, and Outcomes

The term resistance to change is frequently used to explain why organizational change initiatives often fail. Despite the popularity of the term, it has not been extensively researched and no consensus exists concerning the definition of the term. The symposium brings together different approaches to the investigation of the phenomenon.

20. Symposium: Friday, 10:30–11:50 Majestic 4-5 (37th floor-H)

Political Skill, Influence Behavior, and Work Outcomes

This symposium explores 2 relatively unstudied leadership constructs: political behavior and Machiavellianism. Two of the papers show that political skill may be a much more positive and effective characteristic than is sometimes thought. The other 2 papers clarify the Machiavellianism construct and its relationship with other leadership constructs.

21. Interactive Posters: Friday, 10:30–11:20 Majestic 8 (37th floor-H)

Effects of Emotions

Jim Diefendorff, University of Colorado-Denver, *Facilitator*

21-1. Emotional Transfer in Teams: Antecedents, Processes, and Outcomes

We examine the antecedents, processes, and outcomes of emotional transfer in teams. Utilizing a hierarchical linear modeling framework, we analyze intraindividual fluctuations in individual emotion and how emotions are transferred from other team members to the focal individual. We further analyze moderators and outcomes of the processes of emotional transfer.

David T. Wagner, Michigan State University
Remus Ilies, Michigan State University
Frederick Morgeson, Michigan State University

Submitted by David T. Wagner, WagnerD@bus.msu.edu

21-2. Leader Emotions, Transfer of Arousal, and Attribution of Charisma

We argue that leader's enthusiasm leads to higher charisma perceptions of followers than leader's anger, relaxation, or sadness (low arousal and/or negative valence). Importantly, we suggest that this effect is mediated by the transfer of arousal. Data from a scenario experiment and a survey strongly support our model.

Frederic Damen, Erasmus University Rotterdam
Barbara van Knippenberg, Free University Amsterdam
Daan van Knippenberg, Erasmus University Rotterdam

Submitted by Daan van Knippenberg,
dvanknippenberg@rsm.nl

21-3. Effects of Emotions Used in Organizational Planning

The purpose of the study was to assess the effects of emotions on evaluative and generative organizational planning processes. Results show that individuals experiencing a positive emotion perform better at identifying opportunities for plan implementation, whereas people experiencing a negative emotion are better at identifying obstacles in plan execution.

Vykinta Kligyte, University of Oklahoma
Mary Shane Connelly, The FBI
Submitted by Vykinta Kligyte, vcligyte@psychology.ou.edu

21-4. Emotions as Triggers for Idea Generation and Implementation

Emotional conditions of innovativeness have thus far been neglected in innovation research. We therefore develop a model that explains how emotions affect innovative behaviors (idea generation, testing, and implementation) and subsequently test the explanatory power of this model on a sample of managers from different organizations.

Facilitator

23. Poster Session: Friday, 10:30–11:20 Lone Star A-B (2nd floor-CC)

Withdrawal & Job Performance

23-1. The Ties that Bind: Perceived Job Embeddedness and Voluntary Turnover

This study extended research suggesting that people become embedded in their job and community by factors such as marital status. Guided by tenets of field theory and research on perceived control and job fit, findings suggested that perceived embeddedness both mediated and moderated the relation between contextual embeddedness and organizational withdrawal.

Joseph Mazzola, University of South Florida
Steve M. Jex, Bowling Green State University
Rebecca J. Bennett, Louisiana Tech University
Submitted by Craig D. Crossley, cccrossley2@unl.edu

23-2. Linking Personality to College Student Success Through RIASEC Task Environments

Recent advances in theories of personality trait expression as dynamic processes present new opportunities for understanding better the role of personality and behavior in the workplace. The current study examines the interactive effect of personality and environment on performance in a college setting using Tett and Burnett's (2003) trait-activation hypothesis.

Nicholas P. Salter, Bowling Green State University
Michael A. Gillespie, Bowling Green State University

Submitted by Nicholas P. Salter,
nsalter@bgnet.bgsu.edu

23-3. Benefits of Rater Teams: Role of Consensus and Rater Motivation

This study explores how using rater teams can improve behavioral accuracy. Results, based on 111 teams, suggest that an anticipated discussion can improve behavioral accuracy. Requiring consensus, however, improves behavioral accuracy, regardless of whether raters can anticipate group discussion. Lastly, rater motivation plays an important role in discussion-only teams.

Sylvia G. Roch, University at Albany, SUNY

Submitted by Sylvia G. Roch, roch@albany.edu

23-4. Part Timers Retention, Perceived Organizational Support, and Economy Using HLM

Using hierarchical linear modeling (HLM), the perceived organizational support of part-time employees at both Level 1 (district) and Level 2 (region) were related to higher district retention rates. In addition, economic factors at Level 2 also predicted retention rates. Implications for these findings and future research opportunities are also included.

Karl W. Kuhnert, University of Georgia
Scott Mondore, United Parcel Service
Erin Page, Georgia Institute of Technology

Submitted by William A. Gentry, gentryb@leaders.ccl.org

23-5. The Influence of Emotional Intelligence on Feedback Seeking Behavior

We examined the influence of subordinates' perceptions of the emotional intelligence of their supervisor on feedback seeking. Subordinates who perceive their

supervisor as high on emotional intelligence sought feedback more frequently than subordinates who perceive their supervisor as low on emotional intelligence. Further, the feedback environment mediated this relationship.

Jaclyn P. Pittman, Florida Institute of Technology
Lisa A. Steelman, Florida Institute of Technology

Submitted by Jaclyn P. Pittman, JaclynPPittman@aol.com

23-6. Effects of Work Environment on Organizational Commitment in Changing Careers

A key way to elicit employee loyalty today is to enhance situated and deep structure identification. Based on this assertion, we examined management communication, opportunity for learning, and work schedule flexibility as antecedents of organizational commitment. These variables had positive effects on organizational commitment. They also interacted to affect employees.

Submitted by Thomas Ng, twhng@uga.edu

23-7. Measurement Invariance in Performance Appraisal Ratings of U.S. Army Soldiers

This study was intended to examine the superiors' mental models of job performance in ratings of subordinates, specifically, whether the rating instrument used was invariant between supervisory rater groups. Confirmatory factor analysis (CFA) and item response theory (IRT) techniques were used with results suggesting similar performance references between rater groups.

Penny Koommoo-Welch, GlaxoSmithKline

Submitted by Penny Koommoo-Welch,
penny_koommoo@ncsu.edu

23-8. Feedback Discounting: A Mediator of Justice Effect on OCBs

Feedback discounting was introduced as a potential mediator of the relationship between interactional justice and OCBs. Specifically, those who perceived low interactional justice discounted feedback more. Those more likely to discount feedback were less likely to report intentions to use feedback or to engage in OCBs.

Boin Chang, University of Akron
 Marisa Gianvito, University of Akron
 Wendy Muller, University of Akron
 Paul E. Levy, University of Akron

Submitted by Boin Chang, boin67@hotmail.com

23-9. Reactions to the Performance Appraisal Process: Effects of Self-Appraisals

The effect of completing self-appraisals on reactions to the performance appraisal process was examined. Participants who were told their self-appraisals had been used to make ratings reacted more positively than those told their self-appraisals were not used. Also, participants receiving a favorable outcome reacted more positively than those receiving an unfavorable outcome.

Brian M. Bonness, EASI-Consult, LLC
 Therese H. Macan, University of Missouri-St Louis

Submitted by Therese H. Macan,
 Therese.Macan@UMSL.edu

23-10. Factors Affecting Turnover in Different Groups of Part-Time Workers

Past research has failed to consider part-time (PT) employees as a heterogeneous group. Partial inclusion theory can explain how PT groups have different attachments outside the organization and thus, different attitudes and behavior. Commitment, job satisfaction, and quality of alternatives can then differentially predict turnover for the different PT groups.

Jenell L. Senter, Wayne State University
 James E. Martin, Wayne State University

Submitted by Jenell L. Senter, jsenter@wayne.edu

23-11. The Effects of Commitment Attitudes on Retirement and Turnover Intentions

This study examined how 4 work-related commitment constructs and 3 nonwork commitment constructs were associated with voluntary retirement intentions and organizational turnover intentions. Results demonstrated that the commitment constructs differentially relate to retirement and turnover. The implications for revising the definition of work-role attachment theory are also discussed.

Joe A. Schmidt, University of Calgary
 Kibeom Lee, University of Calgary

Submitted by Kibeom Lee, kibeom@ucalgary.ca

23-12. Managers' Reactions to Performance Appraisals: A Meta-Analysis

Managers' dual role as raters and ratees provide them with a broader perspective of performance appraisal systems. Managers' reactions toward their own appraisals were meta-analyzed in an organizational justice framework. Results indicated that fairness perceptions were strongly related to attitudes toward appraisal but outcome favorability showed only a small relationship.

 Geeta C. D'Souza, Central Michigan University
 Stephen H. Wagner, Central Michigan University

Submitted by Gary N. Burns, burns1gn@cmich.edu

23-13. The Difference Between Cognitive and Affective Job Insecurity

Researchers have largely ignored the difference between cognitive and affective job insecurity. Our data shows their independence and a significant difference between the correlational pattern of affective job insecurity with job attitudes, performance, turnover intention, and absenteeism and the correlational pattern of cognitive job insecurity with the same variables.

Cornelius J. Koenig, University of Zurich
 Thomas Staufenbiel, University of Osnabrueck

Submitted by Cornelius J. Koenig, c.koenig@psychologie.unizh.ch

23-14. Performance and Intent to Quit: A Meta-Analysis and Path Model

Utilizing results from other meta-analyses along with the estimate between performance and intent to quit (ITQ) found in this study ($\rho = .12$), path analysis showed that job satisfaction and ITQ did not fully mediate the relationship between performance and turnover. Analyses demonstrated a weak positive indirect relationship between performance and ITQ.

Todd Darnold, University of Iowa
 Ryan D. Zimmerman, University of Iowa

Submitted by Ryan D. Zimmerman,
 ryan-zimmerman@uiowa.edu

23-15. Job-Search Behavior and Two Tests of Mediation

The study examined the mixed test results of mediation in job-search studies and compared 2 tests of mediation by using meta-analytic results to construct a series of path models. The results supported mediation and the self-regulatory model of job search. Revised steps for testing for mediation are proposed.

Mark B. Wolf, Georgia Institute of Technology

Submitted by Mark B. Wolf, yeswin1@aol.com

23-16. Value of Employees: Typical Performance, Maximal Performance, and Performance Variability

This paper further extends the construct of performance, adding performance variability to the existing topics of typical and maximal performance. In addition, we show how each of these conceptualizations of performance predicts unique variance in how organizations value and compensate their employees.

Christopher M. Barnes, Michigan State University

Frederick P. Morgeson, Michigan State University

Submitted by Christopher M. Barnes, barnes@bus.msu.edu

23-17. Managerial Feedback Seeking: The Influence of Perceived Face Loss Costs

Research has found that feedback seeking behaviors and intentions are influenced by individual characteristics and source characteristics. The current study focuses on how the relationship between the individual seeker and the feedback source contribute to perceptions of face loss costs and how those perceptions subsequently affect intentions to seek feedback.

Sarah Gordon, University of Akron

Paul E. Levy, University of Akron

Submitted by Sarah Gordon,
sgordon@barrett-associates.com

23-18. Employee Referral Programs: From Short-Term Outcomes to Return on Investment

We investigated the effectiveness of a referral program for a customer contact position in a communications company. Results indicate that the referral program was effective in reducing early turnover, but over time, this effect diminished. A threshold ROI analysis indicated that the program pays for itself after 2 new hires.

OHP/Stress, Technology

30-1. Workplace Safety: Decision Policies for the Self and “Typical” Other

A policy capturing approach was used to look at factors associated with safe behavior in workplace situations. Results showed that response efficacy, perceived risk, and perceived costs were important factors. When compared to themselves, individuals thought others were less safe and less affected by risk severity.

Michael T. Ford, George Mason University
Lois E. Tetrick, George Mason University

Submitted by Michael T. Ford, mford3@gmu.edu

30-2. Correlates of Three Stress Reactions: A Conceptual and Meta-Analytical Comparison

Felt job stress, mental strain, and physical strain are commonly examined stress reactions. The specificity hypothesis posits that felt job stress relates more closely to job-domain variables, whereas mental and physical strain relate more closely to variables that are broad based. We found support for the specificity hypothesis in a meta-analysis.

Thomas Ng, University of Georgia
Kelly Sorensen, University of Georgia

Submitted by Thomas Ng, twhng@uga.edu

30-3. Social Stressors, Core Self-Evaluations, and Work Outcomes

We examined the relationships between social stressors, job satisfaction, and turnover intentions, and the moderating impact of core self-evaluations on these relationships.

Results indicated that social stressors were negatively related to satisfaction and positively related to turnover intentions and that positive core self-evaluations buffered the negative influence of social stressors.

Paul Harvey, Florida State University
Kenneth J. Harris, Indiana University Southeast
K. Michele Kacmar, University of Alabama

Submitted by Paul Harvey, nph02@fsu.edu

30-4. “Flow” Among Architecture Students: Promoting Well-Being at Work

The study used experienced sampling methodology to track the studio work experiences of 40 architectural students over a 15 week period. Results indicated that core job dimensions facilitated the experience of “flow” and that flow had a positive impact on both mood (hedonic well-being) and perceptions of performance (eudaimonic well-being).

Clive Fullagar, Kansas State University

Submitted by Clive Fullagar, fullagar@ksu.edu

30-5. The Role of Collective Identity in the Organizational Stress Process

The purpose of this paper is to examine the role of collective identity in the organizational stress process. We use the elements of collective identity to understand why employees react differently to similar organizational stimuli and illustrate how collective identity is an integral part of individuals’ coping with organizational stress.

Jason Stoner, Florida State University
Pamela L. Perrewe, Florida State University

Submitted by Pamela L. Perrewe, pperrew@cob.fsu.edu

30-6. Frustration in Graduate School: The Role of Goal Orientation

The purpose of the present study was to investigate whether goal orientation moderates the relationship between quantitative workload associated with both graduate coursework and assistantship duties, and frustration. Results indicated that 2 forms of goal orientation, performance avoidance and mastery orientations, significantly moderated this relationship.

L. Jean Whinghter, Bowling Green State University
Christopher J. Cunningham, Bowling Green State University

Mo Wang, Portland State University
Jennifer L. Burnfield, HumRRO

Submitted by L. Jean Whinghter, lmcmull@bgnet.bgsu.edu

30-7. Testing a Model Of Sense Of Virtual Community

Sense of virtual community (SOVC; i.e., feelings of membership, belonging, identity, and attachment) was examined in 267 members of 7 online groups. Passively and actively exchanging support, perceiving that other members meet face-to-face, and perceiving norms of behavior increase SOVC. Implications for organizational online groups are discussed.

Anita Blanchard, University of North Carolina-Charlotte

Submitted by Anita Blanchard, ALBlanch@email.uncc.edu

30-8. Conflict and Emotional Exhaustion: Another Look at the Burnout Progression

This study is an empirical examination of the effect of conflict at work on the development of burnout for a sample of nurses. Results indicate that emotional exhaustion fully mediated the development of a number of personal and organizational outcomes and partially mediated the development of depersonalization.

Ashley M. Guidroz, Bowling Green State University
Mo Wang, Portland State University
Lisa M. Perez, Minnesota State University-Mankato

Submitted by Ashley M. Guidroz, aguidro@bgnet.bgsu.edu

30-9. Assertive Coping With Workplace Incivility

The current study examines the role of assertiveness in coping with workplace incivility. We proposed that the congruency between personality and gender role with actual coping would impact the incivility-negative outcome relationship. Implications regarding our findings and ideas for future research are discussed.

Jessica A. Gallus, University of Connecticut
Vicki J. Magley, University of Connecticut

Submitted by Jessica A. Gallus, jessica.gallus@uconn.edu

30-10. Interaction of Job-Limiting Pain and Perceived Support on Work Contributions

We conducted 3 studies to examine the interactive effect of perceived organizational support (POS) and job limiting pain (JLP) on performance-related outcomes. POS x JLP explained criterion variance for effectiveness and extra-role behavior in Study 1; effectiveness, work intensity, and citizenship in Study 2; and supervisor-rated task-performance in Study 3.

Zinta S. Byrne, Colorado State University
Wayne A. Hochwarter, Florida State University

Submitted by Zinta S. Byrne, zinta.byrne@colostate.edu

30-11. Attitudinal Determinants of Support for National Smoking Ban

We studied predictors of bar manager support for legislation banning workplace smoking in New Zealand. Results suggest justice considerations are stronger determinants of support than rational/economic factors. Within-cohort comparison showed increased support for the ban 6 months later. Our research has implications for a broad spectrum of social initiatives.

Nigel Guenole, Victoria University of Wellington
Oleksandr Chernyshenko, University of Canterbury
Kiri Milne, New Zealand Health Sponsorship Council
Stephen Stark, University of South Florida

Submitted by Stephen Stark, sstark@cas.usf.edu

30-12. Face-to-Face Versus Virtual Team-Member Selection Decisions

The influence of 5 team-member characteristics on selection decisions for face-to-face and virtual teams was examined. Task skills had a greater impact on selection decisions for virtual teams, and gender influenced face-to-face team selection decisions more. The impact of race, physical attractiveness, and attitudinal similarity did not differ between team types.

Geeta D'Souza, Central Michigan University
Stephen M. Colarelli, Central Michigan University

Submitted by Stephen M. Colarelli, colar1sm@cmich.edu

30-13. Predicting Aggressive Driving Using the Five-Factor Model Personality Variables

Using self-report data from a representative sample of 308 drivers, we examined the relationships between the 5-factor model personality variables and aggressive driving. Results indicated that Neuroticism and Agreeableness were significant predictors of aggressive driving and explained significant incremental variance in aggressive driving over a measure of trait driving anger.

Travis Tubré, University of Wisconsin-River Falls
Bryan D. Edwards, Tulane University
Mike Zyphur, Tulane University
Chris R. Warren, Tulane University

Submitted by Travis Tubré, travis.tubre@uwrf.edu

30-14. The Team Machine: A Decision Support Tool for Team Formation

This work integrates research from I-O psychology, decision science, operations research, and information systems. We discuss a decision-support tool to facilitate creating equally diverse teams and its use in a graduate program. The decision-support tool is designed to provide users with the built-in capability to easily create diverse balanced teams.

Paul K. Bergey, North Carolina State University
Lynda Aiman-Smith, North Carolina State University

Submitted by Lynda Aiman-Smith,
Lynda_Aiman-Smith@NCSU.edu

30-15. The Generalizability of Leadership Across Domains and Time Periods

We investigated the degree to which leadership behavior of individuals is generalizable across leadership domains and time periods. We found that 32% of the variance in leadership role occupancy was associated with a person effect, indicating that leadership behavior is indeed generalizable. We conclude with the implications of our findings.

Kyoung W. Park, University of Minnesota

Submitted by Richard D. Arvey, rarvey@csom.umn.edu

30-16. Critical Incidents at Work: Development of the Workplace Perceptions Questionnaire

This research investigated perceptions of critical incidents at work using the Workplace Perceptions Questionnaire (WPQ), a measure developed specifically for this study.

Reliability analyses indicated internal consistency for most subscales. Regression analyses indicated the risk factor set significantly predicted outcome variables. Considered individually, most factors did not contribute unique variance.

Debra L. Bruns, University at Albany-SUNY
Kevin J. Williams, University at Albany-SUNY

Submitted by Debra L. Bruns, debrabrun@yahoo.com

30-17. An Exploratory Examination of the Determinants of Knowledge Sharing

Using a lab and a field experimental study, we investigated how personality characteristics and accountability mechanisms influence knowledge sharing via a knowledge management system. Results showed that accountability mechanisms had positive effects on knowledge sharing. The personality-situation interactions were discussed. Implications and future research were suggested.

Sheng Wang, University of Nevada-Las Vegas
Raymond A. Noe, Ohio State University
Zhong-Ming Wang, Zhejiang University

Submitted by Sheng Wang,
sheng.wang@ccmail.nevada.edu

30-18. The Effects of Physiological Arousal on an Applied Vigilance Task

Current literature on physiological arousal and vigilance suggests that vigilance may be improved by increasing physiological activity. This hypothesis was tested with an applied sample of lifeguards by utilizing an existing but untested physiologically based scanning strategy. Results indicated higher levels of vigilance with physiologically active strategies.

Jonas P. Johnson, Clemson University
Eric S. McKibben, Clemson University

Submitted by Jonas P. Johnson, jonasj@clemson.edu

30-19. When Does Employee Exercise Benefit the Employing Organization?

Level of exercise, perceived energy and effectiveness, job/life satisfaction, and organizational commitment were examined for individuals in various jobs and with different previous exercise experience. According to the study results, exercise benefits the employing organization and its employees, especially those in less physically demanding jobs.

Lana V. Ivanitskaya, Central Michigan University
 Kimberly J. LeGro, State Farm Insurance
 Nathan A. Bowling, Wright State University
 Kimberly J. LeGro, State Farm Insurance

Submitted by Kimberly J. LeGro, legrokj@hotmail.com

30-20. Oculomotor Measures as Predictors of Performance Under Sleep Deprivation Conditions

This study examined whether oculomotor measures could predict performance on a variety of tasks under sleep deprivation and nonsleep deprivation conditions. Oculomotor measures best predicted performance on vigilance-related tasks when individuals were sleep deprived. Results have implications for work environments as a way to assess fitness for duty.

Laura McClelland, Clemson University
 June J. Pilcher, Clemson University
 James A. McCubbin, Clemson University

Submitted by Laura McClelland, lmcclel@clemson.edu

30-21. Work Overload, Stigma of Psychological Problems, and Health

Examined work overload and perceiving a stigma associated with admitting a psychological problem as predictors of psychological and physical health symptoms. Perceptions of work overload were a stronger predictor of symptoms when soldiers perceived a stigma of admitting a problem, indicating that stigma may potentiate the effects of organizational stressors.

Tiffany M. Greene, Clemson University
 Thomas W. Britt, Clemson University
 Carl A. Castro, Walter Reed Army Institute of Research
 Charles Hoge, Walter Reed Army Institute of Research
 Submitted by Tiffany M. Greene, tmgreen@clemson.edu

30-22. Linking Training to Musculoskeletal Symptoms, Job Dissatisfaction, and Job Insecurity

The results of this study demonstrate that inadequate job training is associated with increased job demands and task ambiguity. Further, increased job demands were associated with greater musculoskeletal symptoms, and decreased job satisfaction and task ambiguity were associated with decreased job satisfaction and increased job insecurity. Implications will be presented.

Jennifer C. Cullen, WA Department of Labor & Industries, SHARP
 Barbara Silverstein, WA Department of Labor & Industries, SHARP

Ninica Howard, WA Department of Labor & Industries, SHARP

Christy Curwick, WA Department of Labor & Industries, SHARP

Submitted by Jennifer C. Cullen, culj235@lni.wa.gov

30-23. Theory of Planned Behavior, Occupational Stress, Implementation Intentions, and Health

The present study examined the theory of planned behavior, occupational stress, and the impact of implementation intentions on an exercise intention-behavior relationship. Results identified past behavior, intention, and attitude as the most important determinants of exercise, but implementation intentions had a backfire effect. Future research is discussed.

Jill S. Budden, Northern Illinois University

Submitted by Jill S. Budden, jbudden@niu.edu

30-24. A Meta-Analysis Of Workaholism Antecedents and Outcomes

This meta-analysis examines antecedents and outcomes of workaholism, as well as the most commonly used workaholism scales. Results suggest that organizations should be aware of the possible negative outcomes of employee workaholic behavior. Moderator analysis suggests that there are differences across scale type, highlighting the need for additional systematic research.

Ludmila Zhdanova, Wayne State University
 Leslie Kay Allison, Wayne State University
 Shuang Yueh Pui, Wayne State University
 Malissa A. Clark, Wayne State University

Submitted by Ludmila Zhdanova, lucia@wayne.edu

30-25. Communications Technology and Person-Perception: Distance Makes the Heart Grow Fonder

Individuals were perceived by their peer-mentors to be more similar and more extraverted if they communicated with them solely through electronic chat than if they communicated face-to-face or through video-teleconferencing. Perceptions of extraversion and similarity explained unique variance in ratings of competence and peer mentors' desire to continue their relationships.

Kimberly A. Smith-Jentsch, University of Central Florida
 Moshe Feldman, University of Central Florida
 Patrick J. Rosopa, University of Central Florida
 Nic Bencaz, University of Central Florida

Submitted by Moshe Feldman, mofeld@yahoo.com

30-26. Empirical Support for a New Approach to Computer-Based Simulation

A new approach to computer-based simulation was developed to measure complex interpersonal skills (i.e. assertiveness). Our computer-based assessment in first-person perspective requires oral responses to simulated events that unfold as a continuous story. Results indicate a positive relationship between self-assessed assertiveness and speech characteristics captured by the simulation.

Kimberly A. Smith-Jentsch, University of Central Florida
 Amy Griffin, University of Central Florida
 Ugochi U. Onyejiaka, University of Central Florida

Submitted by Shannon A. Irving, Amerildal@aol.com

30-27. Temporary Workers' Coping Responses to Sexual Harassment: A Preliminary Model

A model of the coping strategies of temporary workers to sexual harassment is proposed. It is suggested that the coping strategies used by temporary workers will vary depending on the characteristics of the worker and the employment situation.

Kate Rowbotham, University of Toronto

Submitted by Kate Rowbotham,
 rowbotham@Rotman.Utoronto.Ca

30-28. Effects of Self-Monitoring During Face-to-Face and Online Interviews

This study compared face-to-face and online interviews. Results showed that applicants felt less pressure online. High self-monitors expressed decreased procedural justice perceptions when interviews were conducted online instead of face to face. Face-to-face applicants' self-monitoring predicted interviewers' ratings of their qualifications; however, this effect did not extend to the online interviewing environment.

Brad Pearce, East Carolina University
 Lori Foster Thompson, North Carolina State University

Submitted by Lori Foster Thompson,
 lfthompson@ncsu.edu

30-29. Time Management, Circadian Type, and Psychological Well-Being

This correlational study examined the relationships among the behavioral and attitudinal dimensions of time management (TM), circadian type, and the Big 5 personality traits. Positive relationships were found between TM, morningness, and dispositional indicators of psychological well-being. Implications for the dispositional nature of TM and TM training are discussed.

JOIN A WORLD-CLASS ORGANIZATION.

Since 1970, Development Dimensions International has worked with some of the world's most successful organizations to achieve superior business results by building engaged, high-performing workforces.

We excel in two major areas. Designing and implementing selection systems that enable you to hire better people faster. And identifying and developing exceptional leadership talent crucial to creating a workforce that drives sustainable results.

CAPITALIZE ON THE LATEST TECHNOLOGIES.

Apply your skills using sophisticated assessment and development technologies in the e-recruiting/screening and e-learning arenas, and advanced electronic media.

BUILD DYNAMIC, LASTING PARTNERSHIPS.

Through designing and implementing leading-edge HR solutions, your work will add value to thousands of innovative organizations worldwide. Their future success depends on DDI services to maximize the performance of their most important asset—their people.

EXPERTISE—THE DDI DIFFERENCE.

DDI's innovative solutions, including web-based technologies, are customized to the needs of each client by some of the world's leading I/O psychologists, plus a team of 1,000 experienced associates in 75 locations around the world.

DDI VALUES DIVERSITY AND IS AN EQUAL OPPORTUNITY EMPLOYER

Business success demands superior leadership. How do your leaders measure up?

Leadership potential — often discussed but rarely defined. Accurately identifying true high potential leaders and making the right investments in development makes all the difference between achieving excellence or disappointing derailments. But how do you find tomorrow's leaders today? How can you define leadership excellence, assess current capabilities, identify development strategies and enhance leadership performance?

Aon can help.

Our web-based LEADeR™ program offers the best process available for identifying and cultivating leadership potential. LEADeR is our virtual assessment system featuring a realistic and engaging business simulation tailored to reflect your organization's critical business challenges. With LEADeR, your organization can overcome challenges with the most powerful solution in any corporate arsenal — leaders performing at their full potential.

With 500 offices and 47,000 professionals in the United States and abroad, Aon is one of the world's leading providers of risk management, insurance and reinsurance brokerage, and human capital consulting services.

Risk Management • Insurance & Reinsurance Brokerage • Human Capital & Management Consulting • Outsourcing

To find the best employees, first find the best tests.

Few decisions are as important as selecting the right people to help ensure your organization's success. A valid testing system takes the guesswork out of searching for qualified, job-ready candidates.

Aon can help.

We design and implement reliable and valid selection tests for jobs in today's private and public sector organizations. Developed and continuously improved by our worldwide staff of Industrial-Organizational Psychologists, our test portfolio contains over 50 field-proven tests. We efficiently tailor tests with flexible administration and scoring.

These tests have helped our clients reduce turnover, increase sales, reduce litigation, save from lower accident rates, and increase profit.

With 500 offices and 47,000 professionals in the United States and abroad, Aon is one of the world's leading providers of risk management, insurance and reinsurance brokerage, and human capital consulting services.

FORTHCOMING!

Work in the 21st Century

SECOND EDITION

An Introduction to Industrial and Organizational Psychology

FRANK J. LANDY and JEFFREY M. CONTE

Combining top-notch research, consulting, and teaching experience, Frank Landy and Jeff Conte provide students with a foundation that will help them become sophisticated and critical "consumers" of I-O psychology in today's workplace. Streamlined from 16 to 14 chapters, the new edition retains its modular approach, clear explanations, and coverage of key issues but adds many new and exciting topics such as Entrepreneurial Behavior, Internet Attitude measurement, and Selection into Team Leadership Roles. Further, with more cutting-edge references from the new millennium, this edition continues to use case studies and current events (such as the Iraq War and Hurricane Katrina) to explore and explain the role of I-O psychology. Ancillaries include: instructor's manual, test bank, study guide, power point slides, and a fully dedicated web site.

New and Forthcoming Titles from LEA

The Applied Psychology Series

Series Editors **Edwin A. Fleishman, Jeanette N. Cleveland**

The objective of this series is to offer publications that emphasize state-of-the-art research and its application to important issues of human behavior in a variety of societal settings. The goal is to bridge both academic and applied interests.

New Textbook

Staffing Organizations

Contemporary Practice and Theory, Third Edition

Robert E. Ployhart, Benjamin Schneider, Neal W. Schmitt

The third edition of this classic shows how organizations of all sizes can use effective staffing procedures as a source of sustained competitive advantage. The authors review cutting-edge theory and research in diverse areas of importance to the practice of staffing, and identify scientific advances as well as areas that should be informed by additional research.

Performance Measurement

Current Perspectives and Future Challenges

Edited By

Winston Bennett, Jr., Charles E. Lance, David J. Woehr

This book focuses on the dynamic nature of work and the tremendous demands being placed on assessment and measurement as core organizational activities. It also uniquely uses the editors' expertise to provide critical pointers to not only the practical implications of work in the field, but also to the new and continuing issues to be addressed and research to be conducted.

Assessment Centers in Human Resource Management

Strategies for Prediction, Diagnosis, and Development

**George C. Thornton III
Deborah E. Rupp**

The theme permeating this book on assessment centers is "continuity and change", describing what has remained the same and what has changed in the 50-year history of the assessment center method. One of the important changes explored is the evolution of the goals of assessment center programs and the ways in which assessment centers and their component parts have been used.

0-8058-5283-2 [Paper] / 2006 / 365pp. / \$49.95

Continuous Learning in Organizations

Individual, Group, and Organizational Perspectives

Valerie I. Sessa, Manuel London

At the heart of this book is the idea that individuals, groups, and organizations are living systems—nested within each other—with internal learning mechanisms. From this point of view, the book describes the interactions between the levels and how developmental processes at one level affect learning at other levels.

0-8058-5017-1 [Cloth] / 2006 / 248pp. / \$89.95
0-8058-5018-X [Paper] / 2006 / 248pp. / \$29.95

Transformational Leadership

Second Edition

Bernard M. Bass, Ronald E. Riggio

Transformational Leadership, Second Edition is a comprehensive review of theorizing and empirical research that can serve as a reference and starting point for additional research on the theory.

0-8058-4761-8 [Cloth] / 2006 / 296pp. / \$89.95
0-8058-4762-6 [Paper] / 2006 / 296pp. / \$34.50

The Basic Principles of Effective Consulting

Linda K. Stroh, Homer H. Johnson

This book is about what effective consultants do and how they do it. It provides a step-by-step process that can provide successful outcomes for consultants and their clients.

0-8058-5419-3 [Cloth] / 2006 / 192pp. / \$59.95
0-8058-5420-7 [Paper] / 2006 / 192pp. / \$19.95

The Work and Family Handbook

Multi-Disciplinary Perspectives and Approaches

Marcie Pitt-Catsoupes, Ellen Ernst Kossek, Stephen Sweet

For the first time, the efforts of scholars working in multiple disciplines are organized together to provide a comprehensive overview of the perspectives and methods that have been applied to the study of work and family.

0-8058-5025-2 [Cloth] / 2006 / 816pp. / \$225.00

Forthcoming

The Psychology of Entrepreneurship

Edited By

J. Robert Baum, Michael Frese, Robert A. Baron

This is the first book written about the psychology of entrepreneurship. It includes over 60 research questions to guide industrial organizational psychology, organizational behavior, and entrepreneurship research about entrepreneurs. It seeks to answer questions such as, how and why do some people, but not others, recognize opportunities, decide to start new ventures, and organize successful, rapidly growing new ventures.

32. Symposium: Friday, 12:00–1:20 Houston A (3rd floor-CC)

Modern-Day Sexism at Work: Forgotten, but not Gone

This symposium examines the nature, prevalence, and consequences of modern-day sexism in the workplace. Utilizing various theoretical perspectives, the papers collectively demonstrate that although sexism now manifests in subtle and seemingly benign ways, its pernicious effects on individuals and organizations remains pervasive.

48. Special Event: Friday, 12:30–1:20 Austin 2 (2nd floor-H)

Distinguished Early Career Contributions Award

Justice in Teams: Lessons Learned and Future Directions

This session will provide an overview of the justice in teams literature, emphasizing lessons learned and future research directions that need to be explored. The session will focus on how justice is experienced by individual group members as well as how fairness operates at the group level of analysis.

John R. Hollenbeck, Michigan State University, *Chair*
Jason A. Colquitt, University of Florida, *Presenter*

49. Symposium: Friday, 12:30–2:20 Austin 3 (2nd floor-H)

The Intersection of Work and Family Roles: A Crossover and Dyadic Perspective

Work–family research has been criticized for an overemphasis on the individual. This symposium answers the call for more research examining couples and crossover effects from 1 spouse to another. Results of 3 empirical studies that include dual-earner couple data and a comprehensive review of the crossover literature will be presented.

50. Interactive Posters: Friday, 12:30–1:20 Majestic 8 (37th floor-H)

Faking

Amy Hayes, Russell Reynolds Associates, *Facilitator*

50-1. A Structural Equation Model Measuring Faking Propensity and Faking Ability

Measures of several personality variables were obtained in a repeated measures design employing honest, incentive, and instructed-faking conditions. Application of a structural equation model found faking propensity and faking ability latent variables to be uncorrelated. Faking propensity was related to emotional stability. Faking ability was related to cognitive ability.

John Michael Clark, University of Tennessee-Chattanooga
Michael Biderman, University of Tennessee-Chattanooga

Submitted by Michael Biderman,
Michael-Biderman@utc.edu

50-2. Does Test-Taking Motivation Result in More Faking?

This study examines the relationships between test reactions, test-taking motivation, faking behavior, and personality test scores. Results reveal that test takers who are most motivated to do well on the test are also less inclined to fake. Implications of this finding for both the applicant reactions and faking literatures are discussed.

Lynn A. McFarland, Clemson University
Tiffany Bludau, George Mason University
Crystal M. Harold, Indiana University-Purdue
University Indianapolis

Submitted by Lynn A. McFarland, lmcfarl@clemson.edu

50-3. Personality, Faking, and Convergent Validity: A Warning Concerning Warning Statements

Personality measures continue to be criticized for their susceptibility to faking and socially desirable responding. The present study examined the effects of warning applicants against faking on convergent validity of self-observer ratings. Results indicated the warning statements did not improve convergent validity for any of the personality dimensions.

Sean Robson, Radford University
Andrew Jones, Danaher Motion
Joseph D. Abraham, A&M Psychometrics, LLC

Submitted by Sean Robson, smrobson@radford.edu

50-4. Do People Fake on Personality Inventories? A Verbal Protocol Analysis

Verbal protocol analysis of simulated applicants to a personality test suggested that individuals do fake on personality inventories, that individuals can be classed into 1 of 3 faking classes and that honest fakers take less time to complete and make fewer corrections to their personality inventories than faking responders.

Chet Robie, Wilfrid Laurier University

Submitted by Chet Robie, crobie@wlu.ca

51. Community of Interest: Friday, 12:30–1:20 Live Oak (2nd floor-H)

Emerging Topic #2 in I-O Psychology

See registration desk for more information.

52. Poster Session: Friday, 12:30–1:20 Lone Star A-B (2nd floor-CC)

Aging, Motivation, & Culture

52-1. Efficacy Beliefs and Group Members' Motivation Toward Group Creative Processes

This paper examines how efficacy beliefs influence group creative processes. Specifically, it is proposed that self- and group efficacies are positively related to each group member's motivation to engage in group creative processes. Moderators are also considered in the relationship between efficacy beliefs and the motivation toward group creative processes.

Kwanghyun Kim, Texas A&M University

Submitted by Kwanghyun Kim, Kkim@mays.tamu.edu

52-2. Retirement Transition and Adjustment Process: Examining Psychological Well-Being Change Patterns

This study adopted a theory-driven approach to examine retirement transition and adjustment process. Using longitudinal data from *Health and Retirement Survey*, three patterns of retirees' psychological well-being changes were found. Reconciling previous inconsistent findings, this result suggests the existence of multiple retiree subgroups corresponding to different psychological well-being change patterns.

Mo Wang, Portland State University

Submitted by Mo Wang, mw@pdx.edu

52-3. The Role of Affect and Judgment in Goal Regulation

In an Internet-based stock investment simulation, participants adjusted their goals in synchrony with the feedback they received. The feedback-goals relationship was mediated by expectancy/valence judgments. In addition, positive affect partially mediated the feedback-expectancy and feedback-valence relationships, and the 2 judgments fully mediated the impact of positive affect on future goals.

Myeong-Gu Seo, University of Maryland
Remus Ilies, Michigan State University

Submitted by Remus Ilies, ilies@msu.edu

52-4. Factor Structure of the KEYS® Climate for Creativity Scale

We investigated the factor structure of the KEYS® Climate for Creativity Scale. Support for an 8-factor structure was found through exploratory and confirmatory factor analyses. Results are discussed in terms of comparisons with the previously identified factor structure and possible reduction of the KEYS® scale's length.

Daniel Rosenberg, North Carolina State University
S. Bartholomew Craig, North Carolina State University

Submitted by Daniel Rosenberg,
Dan_Rosenberg@ncsu.edu

52-5. Measurement Invariance of a Global Survey Across Six Cultural Regions

We examined the measurement equivalence of an organizational survey across 26 countries in 6 cultural regions. Per region, the survey exhibited form and metric invariance, suggesting that people used the same frame of reference and interpreted the scale intervals similarly. Besides the English-speaking region, no evidence for scalar invariance was found.

Alain De Beuckelaer, Radboud University Nijmegen
Filip Lievens, Ghent University

Submitted by Filip Lievens, filip.lievens@ugent.be

52-6. Creating Profit by Keeping Promises to Employees

Using a large restaurant company, we tested a model of enterprise success to determine the impact the employee experience had upon the customer experience and the impact the customer experience had upon profit. We found that the employee experience predicted the customer experience and that the customer experience predicted profit.

Brian D. Cawley, CorVirtus
Bobby Baker, CorVirtus

Submitted by Brian D. Cawley, BCawley@CorVirtus.com

52-7. Work Habits' Role in the Motivation of Food Safety Behaviors

Work habits at a turkey processing plant were considered in an integrated framework for motivated behavior based on models of intentions. Attitudes and subjective norms toward food safety were able to predict food safety intentions. These intentions along with work habits and perceived behavior control predicted food safety behaviors.

Verlin B. Hinsz, North Dakota State University
Gary S. Nickell, Minnesota State University-Moorhead
Ernest S. Park, North Dakota State University

Submitted by Verlin B. Hinsz, verlin.hinsz@ndsu.edu

52-8. Why Retirees Work: Differential Prediction of Bridge Employment Type

This study examines personal and environmental predictors of 2 types of bridge employment: career bridge jobs and bridge jobs in fields different from one's career. Multinomial logistic regression was used to test differential predictors of either type of bridge employment and full retirement.

Kirsten T. Gobeski, Central Michigan University
Terry A. Beehr, Central Michigan University

Submitted by Kirsten T. Gobeski, gobes1kt@cmich.edu

52-9. Group-Level Analysis of Innovation Implementation Effectiveness

We examined antecedents and mediators of innovation implementation effectiveness, (group perceptions of supervisor fairness, supervisor support for change, and implementation procedures). Results indicated supervisor support as a mediating variable for the supervisor fairness-implementation effectiveness link as well as

the partial mediation of supervisor support–implementation effectiveness link via implementation procedures.

52-10. Relations Between Climate Strength, Individual Function, and Deviant Perceptions

This study looked at relations between climate strength and climate level, and the association between the functions individuals serve in an organization and the extent to which they share the perceptions of their coworkers. Results support the notion that there are differences in the perceptions of worksite subgroups.

52-11. Making Fun of Coworkers: Analyzing the Content of Workplace Humor

We investigated the content, tone, frequency, and offensiveness of humor witnessed and/or personally used to make fun of coworkers by 170 employees working primarily in service industries. Employee perceptions of the potential positive and negative organizational, group, and individual employee-level influences of workplace humor were also examined.

52-12. National Culture Compatibility and Merger and Acquisition Performance

Although many researchers indicate that culture clash plays a major role in the high failure rate of M&As, little empirical research has been conducted. This study found mixed results regarding the impact of national culture differences on the short-term and long-term stock price fluctuations of related cross-border M&As.

52-13. Evolving Mental Models for Retirement

This research proposes a more complex model of retirement than previous research has examined, thereby explaining some of the underlying processes involved in choice of retirement age. A large sample of employees enables the model to be tested across different age groups to show differential relationships with expected retirement age.

Submitted by Beryl L. Hesketh, pvc@cst.usyd.edu.au

52-14. The Relationship Between Employee Participation and Organizational Outcomes Revisited

Using a large sample from a midwest industrial organization, this research demonstrated employee involvement in decision making affects job satisfaction and turnover intentions directly and via an increase in role clarity and perceptions of justice. Analyses suggested outcomes are most strongly affected by employee involvement directly and through justice perceptions.

52-15. Multilevel Analysis: Selling Style, Gender, Culture, and Exaggeration by Salespeople

A multilevel analysis was computed to examine the influence of selling style, gender, and country on the tendency of 18,327 salespeople from 141 companies and several countries to exaggerate. Rapport-oriented sellers exaggerated less than salespeople using other styles, but gender was not significant. U.S. salespeople exaggerated the most.

52-16. The Impact of Job Insecurity on Employee Creativity and Counterproductivity

This study examined the effects of job insecurity on employee creativity and counterproductivity using 144 employees. Results suggest that job insecurity (a) has a detrimental effect on employee creativity, and (b) is related to decreases in counterproductive work behaviors. Implications, limitations, and future research ideas are presented.

52-17. Attitudes Toward Older Workers: Empirical Evidence for a Climate Measure

Organizations are facing a potential skill gap loss due to the impending retirement of the baby-boom generation. The success of retention programs is hypothesized to be influenced by a climate that encompasses employee attitudes toward older workers. This study describes evidence regarding the development and validity of a climate measure.

Ellyn G. Brecher, The College of New Jersey
Eugene J. Kutcher, Virginia Tech
Jennifer D. Bragger, Montclair State University

Submitted by Mike G. Aamodt, maamodt@radford.edu

67-2. Interview Panels: The Impact of Personality and Rating Scale Format

This study examined the impact that 3 personality traits and 2 rating scale formats had on an interview panel's consensus discussion. Results indicated that rating scale format moderated the relationship between personality and the influence exerted during the consensus discussion, as well as the relationship between personality and rating accuracy.

Brian Katz, HumRRO
David P. Costanza, George Washington University
Suzanne Tsacoumis, HumRRO

Submitted by Brian Katz, bkatz@humro.org

67-3. Social Blunders in the Employment Interview: A Cross-Cultural Examination

We investigated the impact violations of specific conversational rules have on interview ratings. Results indicate that violating conversational rules impacts interview ratings and that certain rule violations were more damaging than others. Moreover, the impact of these violations on interview ratings differed across cultures. Implications of these results are discussed.

Michael A. Lodato, Bowling Green State University
Filip Lievens, Ghent University
Scott Highhouse, Bowling Green State University

Submitted by Michael A. Lodato, mlodato@bgnet.bgsu.edu

67-4. The Effect of Interview Format on Personality Judgment and Nonverbal Behavior

We investigated the effect of the structured, unstructured, and informal interview format on personality judgment and nonverbal behavior. Results indicate the informal interview had more accurate personality judgment and higher levels of NVB than other interview types. We conclude with implications for theory and future research.

Seock-Ho Kim, University of Georgia

Submitted by Gary J. Lautenschlager, garylaut@uga.edu

69-2. Multilevel Homology Tests Are Easiest with Multilevel Structural Equation Modeling

This article shows the usefulness of multilevel SEM for testing multilevel homology, as these tests graft easily onto a traditional SEM approach and exposes a flaw of many multilevel analyses using HML/MRCM: They assume multilevel homology. Multilevel SEM is explained, multilevel homology is tested, and sample program code is provided.

Michael J. Zyphur, Tulane University

Submitted by Michael J. Zyphur, zyphurmj@yahoo.com

69-3. Generalized Multilevel Structural Equation Modeling for Research in Organizations

This paper explores a generalized framework for multilevel research in organizations. This framework has the SEM and the HLM/MRCM as special cases with the possibility of many underlying variable distributions. The framework is explained and examples given of multilevel CFA, multilevel SEM, and multilevel mixture modeling.

Michael J. Zyphur, Tulane University

Submitted by Michael J. Zyphur, zyphurmj@yahoo.com

69-4. Identifying Key Drivers From Survey Data: Comparing Regression to CHAID

We investigated 2 vastly different methodologies for identifying key drivers in a large dataset of employee opinion data. CHAID worked as well as, if not better than, linear regression. The key drivers identified by the 2 methods overlapped but not completely. The results suggest wider use of the CHAID methodology.

69-7. Using the Chow Test for Regression Analysis of Compensation Discrimination

The OFCCP (2004) recently provided new "proposed" compensation analysis guidelines that involve multiple regression and identifying similarly situated employee groups (SSEGs). They suggest the Chow test for determining whether regression equations should be pooled across SSEGs. We explain the Chow test and describe some alternatives that may be more appropriate.

Submitted by Gregory M. Hurtz, ghurtz@csus.edu

69-8. A Lexical Study of Communication Styles

One of the main problems in current interpersonal communication research is the lack of an encompassing framework that captures the different communication styles. This paper provides such a framework using a multiphase lexical study. The content and interrelations of the 7 main communication style dimensions uncovered are described.

Reinout E. de Vries, Vrije Universiteit Amsterdam

Submitted by Gert J. Homsma, gj.homsma@psy.vu.nl

69-9. Comparing Empirical Keying Methods at Different Sample Sizes

The cross-validities of several empirical keying methods for a biodata inventory were compared at different samples sizes. Results suggest that differences in empirical keying methods exist predominantly at smaller samples sizes. Although stepwise regression weighting of items does yield slightly higher cross-validities, it requires larger samples.

Submitted by Jeffrey M. Cucina, jcucina@gwu.edu

69-10. The Changing Nature of Clerical Job Performance: Revisiting Validity Estimates

The current meta-analytic study assesses the validity of several knowledges, skills, and abilities as predictors for clerical job performance. Due to technological changes in office work, it was argued that criterion-related validity coefficients have changed since the publication of Pearlman, Schmidt, and Hunter's (1980) comprehensive meta-analysis.

Tine Koehler, George Mason University
Dalit Lev-Arey Margalit, Edison Electric Institute

Submitted by Tine Koehler, tkoehler@gmu.edu

69-11. Alternate Cutoff Values and DFIT Tests of Measurement Invariance

Few studies have assessed the efficacy of the differential functioning of items and tests (DFIT) methodology for assessing measurement invariance with Likert data. Monte-Carlo analyses indicate large improvements in the sensitivity of the DFIT methodology for identifying lack of measurement invariance when using appropriate, empirically derived, cutoff values.

Submitted by Adam W. Meade, adam_meade@ncsu.edu

69-12. Correcting Missing Data Bias in ICC(1) and ICC(2)

Missing data bias in intraclass correlations is assessed. Using empirical and analytical methods, a nonlinear bias in ICC(1) is revealed, which worsens under low within-group and high between-group response rates. ICC(2) estimates decline nonlinearly with within-group response but are legitimately reduced (not biased) by missing data. Correction formulae are provided.

Hock-Peng Sin, Pennsylvania State University
Daniel A. Newman, Texas A&M University

Submitted by Hock-Peng Sin, hpsin@psu.edu

69-13. Examining the Relationship Between Differential Item Functioning and Item Difficulty

This study examines the generalizability of previous research that has found a relationship between item difficulty and differential item functioning (DIF) such that easy test items disadvantage minority test takers. The results replicate the relationship between item difficulty and DIF using alternative standardized tests and DIF analyses based on IRT.

69-14. Differences of SI and BDI: Is It Really Predictive Validity?

Results from a predictive validity study are reported for situational interviews (SI) and behavior description interviews (BDI) for 4 jobs on different complexity levels. Results indicate that both interview formats are highly correlated with job performance ($N = 617$). However, comprehensive internal and external construct analysis revealed differences in construct validity.

88. Symposium: Friday, 3:30–5:20 Lone Star C4 (2nd floor-CC)

Linking Personality to Decision Making in Recruitment and Selection

Decision-making research has often focused on general processes with limited ability to account for individual differences in decision-making tasks. Research in this symposium focuses on how personality affects judgment and decision making in the area of recruitment and selection from the perspective of job seekers and organizational decision makers.

94-3. A Preliminary Investigation of the Work Avoidance Goal-Orientation Construct

A new work avoidance goal-orientation scale was developed that captures the desire to minimize effort at work. The construct was related to alienation and perceiving one's job as meaningless and uninteresting. Work avoidance demonstrated usefulness in predicting job perceptions when combined with more traditional goal orientations as predictors.

Goal Orientation

Michael Horvath, Clemson University, *Facilitator*

94-1. Comparing Two, Three, and Four-Dimensional Measures of Goal Orientation

The present study compared measures of 2-, 3-, and 4-dimensional models of goal orientation. The results showed that, in general, these measures possessed good psychometric qualities (factorial validity, reliability, convergent and divergent validity) and that they were meaningfully related to proactive personality, intrinsic motivation, and fear of failure.

Karen Van Dam, Tilburg University

Submitted by Karen Van Dam, K.vanDam@uvt.nl

94-2. Trait-Based Goal Orientation and Performance: A Meta-Analysis

The relationship between trait-based measures of goal orientation and performance in work motivation and other achievement contexts was examined. Meta-analytic analysis revealed a positive relationship between learning goal orientation and performance. The various relationships found between performance goal orientation and performance were also investigated and discussed.

Kathleen M. Arnold, DePaul University
 Douglas F. Cellar, DePaul University

94-4. Are They Really the Same? Convergence of Goal Orientation Measures

We examined convergent validity of 3 goal-orientation measures, 2 trait goal-orientation measures, and 1 measure of state goal orientation. In addition, we investigated mastery-avoidance goal orientation, a 4th goal-orientation construct, in both trait and state measures. Results and implications for theory and future research are discussed.

George C. Thornton, Colorado State University,
Facilitator

96. Poster Session: Friday, 3:30–4:20 Lone Star A-B (2nd floor-CC)

Job Attitudes

96-1. The Impact of the Feedback Environment on Job Satisfaction

This study uses a longitudinal design to examine the relationship between the feedback environment and job satisfaction. Results from a sample of 155 employees showed that a favorable feedback environment was related to higher levels of job satisfaction and that this relationship was mediated by the quality of leader–member exchange.

Frederik Anseel, Ghent University
Filip Lievens, Ghent University

Submitted by Frederik Anseel, Frederik.Anseel@ugent.be

96-2. Job Reactions of Nontraditional or “Contingent” Professional Workers

This research distinguishes several forms of nontraditional work and assesses respondents’ various motives for working in those arrangements. Performing temporary or contract work results in less commitment to the organization, and workers who obtained jobs on their own had greater organizational commitment than those placed by a staffing firm.

Jay M. Finkelman, Alliant International University, C.S.O.S.
Brian Redmond, Baruch College, CUNY

Submitted by Joel M. Lefkowitz,
Joel_Lefkowitz@baruch.cuny.edu

96-3. Does Normative Commitment Develop Through Team Processes? Implications for Turnover

This study looked at how team processes impact the normative commitment–turnover relationship. Results indicated that perceptions of team cohesion partially mediated the relationships between global normative commitment and turnover intention and local normative commitment and turnover intention. Team size was also found to negatively correlate with both foci of commitment.

Jesse Erdheim, Bowling Green State University
Submitted by Jesse Erdheim, jerdhei@bgsu.edu

96-4. Job Satisfaction Among Healthcare Employees: Does Time of Year Matter?

The study explored how differences in measurement influenced job satisfaction ratings. Results showed that using facet measures of job satisfaction may not necessarily always be worthwhile. In addition, the time in which satisfaction was measured was found to be a significant factor yielding many interesting implications that are further discussed.

Karen Kozminski, Illinois Institute of Technology

Submitted by Nahren Ishaya, ishanah@iit.edu

96-5. Outcomes Associated With Perceptions of Organizational Politics: A Meta-Analysis

Meta-analytic correlations from 53 samples were obtained for relationships between perceptions of organizational politics (POP) and job satisfaction, job anxiety, turnover intentions, organizational commitment, and job performance. POP is associated negatively with job satisfaction and organizational commitment, positively with job anxiety and turnover intentions, and non-significantly with job performance.

Brian K. Miller, Texas State University-San Marcos
Matthew A Rutherford, James Madison University
Robert W. Kolodinsky, James Madison University

Submitted by Brian K. Miller, bkmiller@txstate.edu

96-6. Discrepancy, Velocity, and Job Satisfaction: Temporal Orientation as a Moderator

This study proposed and tested a dynamic perspective of job satisfaction that discrepancy and velocity information jointly predict job satisfaction. It also demonstrates that discrepancy information has stronger effects on job satisfaction for those with high present orientation, whereas velocity information was more important for those with high future orientation.

Chu-Hsiang Chang, Roosevelt University
Russell E. Johnson, University of Akron

Submitted by Chu-Hsiang Chang, changc1@rcn.com

96-7. Validation of the Index of Organizational Reactions (IOR) Short Form

Participants completed the short form IOR, AJDI, and a condensed MSQ. The short form IOR demonstrated construct validity and accounted for incremental variance in job performance and turnover intentions beyond the AJDI and MSQ, suggesting that it may be a viable alternative to other abbreviated measures of facet job satisfaction.

James W. Badaglia, Big Red Rooster
Mark S. Nagy, Xavier University

Submitted by Mark S. Nagy, nagyms@xu.edu

96-8. Predictability and Consequences of Employee Engagement

We investigated the relationships of personality-based measures with employee engagement and the impact of employee engagement levels on job performance. Our findings indicated several strong personality correlates of engagement and moderate links between engagement and performance on interpersonally oriented work activities.

Joseph A. Jones, Development Dimensions International
Submitted by Evan F. Sinar, evan.sinar@ddiworld.com

96-9. Understanding the Variability of Job Satisfaction

The intraindividual variability of different facets of job satisfaction was measured daily over a 1 month period. Results suggest that individuals' job satisfaction (JS) significantly varies over shorter time frames but mean levels of satisfaction remain fairly consistent and that this variability is a unique predictor of workplace outcomes.

Lindsey Marie Young, Wayne State University
Boris B. Baltes, Wayne State University

Submitted by Lindsey Marie Young, lmyoung@wayne.edu

96-10. Consequences of Nepotism in the Family Firm: It's All Relative

The current investigation focuses on the effects of nepotistic behaviors in family-owned businesses. Both family and nonfamily member perceptions were compared. It was found that preferential treatment toward kin lead nonfamily members to perceive these nepotistic practices as unfair and perceive those who administer such acts as untrustworthy.

Jennifer Spranger, Grand Valley State University

Submitted by Jennifer Spranger, sprangej@gvsu.edu

96-11. A Longitudinal Unit-Level Test of the Employee Satisfaction-Performance Link

We present an integrated unit-level model of organizational performance using data collected during each of 4 quarters over a 1-year period of time. Responses from 8,535 employees and nearly 180,000 customers in 558 units were used. Employee satisfaction, turnover, efficiency, guest satisfaction, and financial performance are included in the model.

David L. Van Rooy, Marriott International
Chockalingam Viswesvaran, Florida International University

Submitted by David L. Van Rooy, dvanrooy@hotmail.com

96-12. A Meta-Analytic Investigation of the Unit-Level Employee Satisfaction-Performance Link

We present meta-analytic results linking unit-level employee satisfaction to several variables including job performance, withdrawal behaviors, leadership, commitment, and customer satisfaction. After correction for attenuation, the correlation between employee satisfaction and job performance was .30. We provide separate analyses based on rating source, performance domain, and organizational type.

Daniel S. Whitman, Florida International University
Chockalingam Viswesvaran, Florida International University

Submitted by David L. Van Rooy, dvanrooy@hotmail.com

96-13. Situation Strength and the Dispositional Approach to Job Satisfaction

The current study examines whether situation strength moderates the relationships between dispositions and job satisfaction. Data from 466 university employees indicated that negative affectivity and core self-evaluations, but not positive affectivity, were more strongly associated with job satisfaction for individuals working in weak rather than strong work environments.

Nathan A. Bowling, Wright State University
Terry A. Beehr, Central Michigan University

Submitted by Jamie S. Donsbach, jd5247@albany.edu

96-17. Does Demographic Item Nonresponse Relate to Job Attitudes?

Nonresponse to demographic items can be due to purposeful omission (e.g. to protect one's identity) or forgetfulness. This study examines whether nonresponse to demographic items ($n = 773$ employees) relates to job attitudes. Results support the hypotheses: Missing demographic data was related to lower satisfaction with management and lower perceived job security.

96-21. Assessing Trust in Leadership at Dyadic and Organizational Levels

We qualitatively examined the multidimensional nature of trust in leadership for both dyadic (i.e., supervisor) and organizational (i.e., top management) referents. Working adults generated adjectives that characterize trust in leadership for both referents. Results revealed a consistent 4-dimensional structure of trust in leadership across dyadic and organizational levels.

96-24. Job Satisfaction and Union Participation: Cross-Level and Group-Level Interactions

This study proposes that job satisfaction impacts union participation more strongly when satisfaction is conceptualized at the group level. Results also confirm group- and cross-level interactions between job satisfaction and union commitment, with opposite moderator effects at the individual versus group level of aggregation.

Alexander R. Schwall, Pennsylvania State University
Daniel A. Newman, Texas A&M University

Submitted by Alexander R. Schwall, ars214@psu.edu

96-25. Personality and Organizational Commitment: Medial Role of Job Characteristics Perceptions

We examined whether perceptions of job characteristics mediated the relationship between personality (5-factor model) and organizational commitment. Results indicate perceptions of job characteristics mediated the relationship between personality (Neuroticism, Extraversion, Agreeableness, and Conscientiousness) and affective, and personality (Extraversion, Agreeableness, and Conscientiousness) and normative, but not continuance, commitment.

96-27. Construct Validation of Equity Sensitivity: New Evidence of Multidimensionality

Huseman, Hatfield, and Miles' (1985) equity sensitivity instrument utilizes a forced distribution to allocate points between benevolent and entitlement statements, which results in the measurement of equity sensitivity as unidimensional. We provide an empirical demonstration that a single-stimulus format allows for multidimensionality and investigate the construct validity of this alternative measurement.

Kristl Davison, University of Mississippi
Mark N. Bing, University of Mississippi

Submitted by Kristl Davison, kdavison@bus.olemiss.edu

96-28. Work–Family Conflict, Emotions, and Satisfaction: Effects at Work and Home

Using experience-sampling methodology, we investigated the effects of family-to-work conflict experienced at work and work-to-family conflict experienced at home on emotions (hostility and guilt) and job and marital satisfaction, as well as the moderating role of trait hostility on the conflict–emotion relationships. Results generally were supportive of the hypotheses.

Submitted by Sally A. Carless,
sally.carless@med.monash.edu.au

104-3. The Influence of Leaders' Regulatory Focus Modeling on Employee Creativity

This study investigates the relationship between leadership role modeling and employee creativity and innovation in a Chinese organization. Specifically, we examined whether immediate supervisors' regulatory focus influenced employee creativity and innovation. Results indicated that both creativity and innovation are positively associated with promotion-focused leadership behavior. Implications are discussed.

Xiang Yi, Western Illinois University

Submitted by Ju-Chien Cindy Wu, Cindy_Wu@baylor.edu

104-4. Climate for Creativity: A Quantitative Review

A meta-analysis was conducted using 42 prior studies where the relationships between climate and various indices of creative performance were examined. These climate dimensions were found to be effective predictors of creative performance across criteria, samples, and settings. The implications of these findings for understanding creativity and innovation are discussed.

Katrina E. Bedell, University of Oklahoma
Michael D. Mumford, University of Oklahoma

Submitted by Sam T. Hunter, shunter@psychology.ou.edu

105-3. Personality and Motivational Predictors of Soft Skills Performance

The dimensionality of soft skills performance is investigated within a nomological network of nonability individual differences. The soft skills performance questionnaire (SSPQ) is developed based on a series of studies to develop a taxonomy of skills. Results showed that nonability traits predicted performance through their influence on proximal motivational processes.

105. Poster Session: Friday, 4:30–5:20 Lone Star A-B (2nd floor-CC)

Job Analysis & Performance

105-1. Outcomes of Perceived Organizational Support: The Role of Pay Context

Two studies examined how pay structures influence the degree to which perceived support affects performance and commitment. With higher contingency of pay on performance, the effect of perceived organizational support on performance decreased, and the effect of perceived supervisor support on performance increased. Commitment was not affected by pay structure.

Asya Pazy, Tel Aviv University
Yoav Ganzach, Tel Aviv University

Submitted by Asya Pazy, asyap@post.tau.ac.il

105-2. An SDT Analysis of Error Detection in a Simulated Pharmacy Environment

Eighty-five participants completed a detection task under different decision payoff conditions. The task mimicked prescription checking in a pharmacy. Errors varied across high, medium, and low saliences. Hit rate was associated with error salience in the payoff condition, and selective attention was associated with hit rate in the control condition.

nikki.dudley@shakercg.com

105-14. Defining Productivity as the Product of Efficiency and Effectiveness

The purpose of this paper is to define in objective, measurable terms individual employee productivity. The authors contrast an additive and a multiplicative model with varying levels of efficiency and effectiveness to determine the best way to quantify individual productivity and conclude that the multiplicative model is superior.

Saurabh S. Deshpande, Texas A&M University
Stephanie C.. Payne, Texas A&M University

Submitted by Saurabh S. Deshpande, saurabhd@tamu.edu

105-15. OCB Redeemed: A Qualitative Study of Discretionary Contributions at Work

We use qualitative research methods (grounded theory) to reexamine the discretionary nature of organizational citizenship behavior and the factors influencing employee decisions about withholding and making citizenship contributions. We show that OCB can be discretionary in nature and highlight the practical and research implications that follow.

Sankalp Chaturvedi, National University of Singapore
Daniel J. McAllister, National University of Singapore

Submitted by Sankalp Chaturvedi, sankalp@nus.edu.sg

105-16. Adaptability: A Distinct Dimension of Leader Performance?

Adaptability has received recent attention as an important factor of employees' job performance. We investigated whether adaptability is distinct from task and contextual performance and contributes uniquely to overall performance. Our results demonstrated that adaptability was closely related to some leadership behaviors but was an important dimension of leader performance.

105-17. Differences in Raters' Sensitivity to Constraints on Ratee Performance

This study examines the antecedents and consequences of supervisor's consideration of situational influences when making performance ratings. Results found raters who considered situational influences were more likely to give higher ratings. Such raters also tended to be more innovative, sociable, adaptable, and self-controlled.

Jeff A. Weekley, Kenexa
Robert E. Ployhart, University of South Carolina

Submitted by Jeff A. Weekley, jeff.weekley@kenexa.com

105-18. Learning Goal Orientation, Monitoring, and Creativity: Mediating Role of Scouting

Using survey data from 3 sources (157 employees and their coworkers and supervisors), researchers found that creativity had a direct relationship with supervisor close monitoring (negative) and learning goal orientation (positive). The effects of supervisor close monitoring and learning goal orientation on creativity were completely mediated by scouting behavior.

114-1. The Role of Employee Attributions of HR Practices in SHRM

S. Rains Wallace Dissertation Research Award

To address the dearth of research on the link between employee experiences of HR practices and unit/organizational effectiveness, I introduce the construct of HR attributions and show that the attributions employees make about why management adopts the HR practices that it does influences their attitudes, behaviors, and ultimately, unit effectiveness.

Lisa H. Nishii, Cornell University

114-2. A Comment on Employee Surveys: Examining Open-Ended Responses

Technological advances are changing the role of open-ended comments in organizational survey initiatives. Meanwhile, little is known about the characteristics of these comments, the attitudes of those providing them, and the relationship between quantitative and qualitative responses. This study uses data from an employee survey ($N = 661$) to examine these issues.

114-12. Who's Procedurally Just? The Role of Managers' Implicit Personal Theory

Strong employee reactions to procedural injustice have inspired interventions aimed at increasing managers' procedural justice. In the present study, managers holding the "incremental" implicit theory (i.e., belief that people tend to change) predicted employee perceptions of procedural justice and subsequent organizational citizenship behavior, as mediated by employees' organizational commitment.

Peter A. Heslin, Southern Methodist University

Don VandeWalle, Southern Methodist University

Submitted by Peter A. Heslin, heslin@cox.smu.edu

114-13. Job Insecurity and Accident Underreporting

Data from 359 employees located in 4 organizations suggest that perceptions of job insecurity may serve to inhibit the reporting of accidents to supervisors. Analyses indicate that when job security is high, there is little difference between reported and unreported accidents. However, as job security decreases, employees underreport more accidents.

Tahira M. Probst, Washington State University-Vancouver

Submitted by Tahira M. Probst,
probst@vancouver.wsu.edu

114-14. Accountability Influences Decoy Effects on Group-Based Selection Decisions

The decoy effect occurs when preferences between 2 alternatives reverse as a result of the manipulation of an inferior 3rd alternative. This research showed that when decisions were made by groups, the decoy effect held only when decision makers knew they would have to justify their decision processes.

114-15. Concept Redundancy Among Forms and Bases of Commitment

This study examines concept redundancy among forms (affective, normative, continuance) and bases (compliance, identification, internalization) of commitment. Confirmatory factor analyses supported a 4-factor model combining affective commitment, normative commitment, and identification. This model fit the data well, and a 6-factor model fit no better and contained extremely high correlations.

Thomas E. Becker, University of Delaware

Submitted by Thomas E. Becker,
beckert@lerner.udel.edu

114-16. An Evaluation of the Cross-Cultural Generalizability of Organizational Commitment

This study evaluated similarities and differences across national boundaries in the measurement of organizational commitment, its mean levels, and its relationships with job satisfaction. Aside from measurement nonequivalence arising from item wording complexities, universality was observed in the measurement of commitment, mean levels of commitment, and in relationships with satisfaction.

Employee Engagement Surveys

Foresight supports over a dozen Best-In-Class organizations by engaging their employees across 150 countries and in 36 languages so they can stay on top of their industry.

Foresight can help you to:

- Ask the right questions
- Design secure attractive websites
- Distribute reports electronically to all your managers across the world
- Enhance your reports with national or country norms
- Support managers with online guides and Ad Hoc reporting tools
- Increase cost savings across your organization
- Turn survey results into action plans
- Link financial/customer data to your employee survey results
- Engage your employees and managers

WEB AND DUAL-METHOD SURVEY SOLUTIONS

Scores of companies offer web-surveys.
But often their perspective and capabilities are limited.

DRC has nearly a decade of web and
dual-method (web + paper) survey experience.

We offer complete solutions—survey design,
printing, web-survey hosting, data collection,
analysis and reporting—under one roof.

Let our expert attention to both the big picture and
the smallest detail increase the value of
your research investment. Give us a call today.

Perceived Organizational Support: The Key Role of the Supervisor

We examine supervisors' contributions to perceived organizational support (POS), addressing 4 questions: (a) What factors affect supervisors' impact on POS? (b) Do supervisors or coworkers contribute more to POS? (c) How do supervisors influence employees' reciprocation of POS? (d) How can supervisors maintain employees' POS when employees are treated unfavorably?

126. Symposium: Saturday, 8:00–9:50 Austin 1 (2nd floor-H)

Recent Developments in Efficacy Research: Interventions and Temporal Relationships

Results from longitudinal and experimental studies of efficacy–performance relationships are reported. Both self- and team efficacy are shown to be influenced by various interventions. The longitudinal results, however, suggest that such relationships are not stable over time. Team composition and development variables are featured as potential moderators of effects.

135-1. Cross Cultural Variations in Climate, Stress and Organizational Productivity Relationships

We examined the relationships between organizational climate, employee stress and organizational productivity in a cross-national study of 51 UK and 104 Chinese manufacturing organizations. The results indicated divergence between contexts. Climates that facilitate employee autonomy displayed a differing pattern of relationships with employee stress and productivity across contexts.

135-4. A Biodata Inventory for Expatriate Selection: Assessing Cross-Cultural Adaptability

This study set out to develop and validate a biographical data inventory called BICCA for assessing cross-cultural adaptability in expatriate managers. Results from 202 expatriates suggest that the BICCA is an effective alternative to commonly used personality inventories in measuring cross-cultural adaptability. We conclude with practical implications.

Nancy Groesch, EADS

Submitted by Nancy Groesch, nancy.groesch@eads.net

136-3. Longitudinal Changes in Testing Applicants and Labor Productivity Growth

Longitudinal reviews of surveys on the incidences of using ability, personality, and other tests for applicants, are reported in the framework of *Griggs v. Duke Power* (1971). Models of selection utility are reviewed, and expected relationships between testing incidences and national labor productivity (output per hour) are stated and explored.

Submitted by Donald L. Harville, Harville@ix.netcom.com

136. Poster Session: Saturday, 8:00–8:50 Lone Star A-B (2nd floor-CC)

Selection

136-1. Assessment Centers: Current Practices in the United States

Our primary goal was to describe the “state of the art” of assessment center (AC) practices in the U.S. In addition, we evaluated whether ACs follow the *Guidelines for AC Operations* (2000). Finally, we compared our findings to a prior study (Spychalski et al., 1997) to determine current trends.

136-2. Adverse Impact Prediction: Implications of Using the Eighty Percent Rule

This study examined the implications of modeling adverse impact via linear regression as a continuous ratio and via logistic regression as an 80% rule decision. Results indicated differential prediction across adverse impact measures for varying selection ratios and percentages of focal group applicants.

Submitted by Eric M. Dunleavy, edunleavy@air.org

136-4. A Multifaceted Comparison of Situational Judgment and Biodata Keying Methods

Our research evaluated the impact of development sample size on the effectiveness of various situational judgment and biodata empirical keying methods. Effectiveness metrics included criterion-related validity, validity shrinkage with cross-validation, and race/ethnicity subgroup differences. We discuss potential implications for researchers considering the appropriateness of empirical keying for these content types.

136-5. Letters of Recommendation: Controversy and Consensus From Expert Perspectives

This study investigated the opinions and usage of letters of recommendation (LORs) by personnel-related professionals. The results demonstrated that LORs are still relied upon in academia; however, appear to be “phasing out” in applied professions. All professionals identified inflation as a problem with LORs that may never be resolved.

Sylvia G. Roch, University at Albany, SUNY

Submitted by Jessica M. Nicklin, jn0702@albany.edu

136-6. Changes in Test Anxiety Before a Work Sample Test

Previous research has found negative relationships between test anxiety and performance on cognitive exams. The present study examined the relationship between test anxiety and performance on a work sample test. HLM analyses found differences in the pattern of anxiety for individuals who passed and individuals who failed the exam.

Nathan Schneeberger, Excelsior College

Submitted by Nathan Schneeberger, ns9529@albany.edu

136-7. Exploring the Processes of Self-Awareness

Study 1 outlined self-awareness processes by examining its cognitive structure. Interviews with 21 assessment center participants surfaced 8 performance strategies. In Study 2, these strategies were validated on a postgraduate sample. Using only numerical indices of self-awareness fails to reflect how effective performance strategies may be used in selection.

Submitted by Eric A. Surface, esurface@swa-consulting.com

136-10. Effects of Personality Test Format on Faking, Validity, and Reactions

Recent research suggests that forced-choice personality measures are more resistant to faking than Likert-type measures. This study examined practical issues associated with the use of forced-choice measures, focusing on faking, criterion-related validity, and test-taker reactions. Results indicated forced-choice measures demonstrate incremental validity over cognitive ability and produce limited negative reactions.

George E. Paajanen, Unicru, Inc.

Submitted by Nisreen H. Pedhiwala, nisreen@pdx.edu

136-12. Construction and Validation of the Interview Faking Behaviors Scale

A typology of faking behaviors is proposed. Candidates will fake in order to create images, protect images, and ingratiate. The Interview Faking Behavior (IFB) scale was developed, and then tested with several independent samples of job candidates ($N_{\text{total}} = 1,075$). This study demonstrates evidence of the construct validity of the scale.

Scott B. Morris, Illinois Institute of Technology

Submitted by Scott B. Morris, scott.morris@iit.edu

136-18. The Prevalence of Faking Among Icelandic Job Applicants

The prevalence of several faking behaviors was assessed, using a sample of Icelandic job applicants. Serious faking such as fabrication of data was almost nonoccurring, and about a quarter of the applicants engage in mild faking. The faking base rates are compared to the results of Donovan et al., (2003).

Leifur Geir Hafsteinsson, Reykjavik University

Submitted by Leifur Geir Hafsteinsson, lgh@ru.is

136-19. Comparing IVR and Web-Based Approaches for Preemployment Screening

This study evaluated the effects of test modality on responses to items used for simple prescreening of job applicants. Over 50,000 participants completed an initial application using either interactive voice responses (IVR) or the World Wide Web. After controlling for demographic differences, item responses did not differ across tests modalities.

141-20. Workplace Romance: Examining Sexual Orientation, Power Differences, and Organizational Culture

Little research has examined how observers react to workplace romances and what they think management should do. This experimental study examined sexual orientation of romance participants (homosexual/heterosexual), power (lateral/hierarchical romance), and organizational culture (conservative/liberal). There were more negative reactions toward hierarchical romances and homosexual couples and different relationship motives ascribed.

141-21. Coming Home: A Reservist Perspective on the Repatriation Process

A longitudinal, qualitative study was conducted with Army reservists to examine the process of returning to the civilian workforce after a combat deployment. A process model of reintegration emerged consisting of 4 stages. This study contributes to the literature on general repatriation as well as repatriation work adjustment.

141-22. The Effects of Accent on Perceptions of a Medical Doctor

This study investigated respondents' initial perceptions of hypothetical medical doctors differing on accent type (Anglo, Chinese, Asian Indian, and Spanish) and sex. Results showed that foreign-accented doctors evoked more negative affect but were perceived as favorably as Anglo-accented doctors on social status, solidarity, and trustworthiness.

141-23. Women Managers: Self-Imposed Barriers to Career Advancement

In this study the authors compare networking comfort levels of male ($n = 32$) and female ($n = 33$) senior executives with female mid-level ($n = 88$) managers. Although both male and female senior executives were quite similar and comfortable with networking activities, the mid-level female managers reported significantly higher levels of networking discomfort.

141-24. Do Cross Cultural Values Affect Multisource Feedback Dynamics?

This study tests the effect of cultural values on multisource feedback utilizing a sample of 501 managers from Venezuela, a collectivistic and high power distance country. Results indicate that cultural values distort boss-subordinates feedback, focus evaluation on collectivist behaviors, and facilitate consensus among sources. Theoretical and practical implications are discussed.

Submitted by Otmar E. Varela, otmar.varela@nicholls.edu

141-25. The Impact of Personal Comfort With Diversity on Group Functioning

We examine personal comfort with diversity as a moderator of age, gender, and race dissimilarity effects and 3 aspects of group functioning. Results showed that individuals who have low personal comfort with diversity were strongly affected by being different than others in their work group. Asymmetrical subgroup effects were found.

141-27. The Bill Cosby Effect: Does Audience Race Influence Evaluations/Criticism?

The racial audience (experimenter race) was found to influence both Black and White raters in their evaluations of a Black applicant. In front of a Black audience, Black raters lower ratings of "good" performances and increase ratings of "bad" performances. White raters were less influenced by audience race.

**164-3. Protégé Characteristics Associated With
Volunteer Participation in Formal Mentoring**

Participants in a voluntary formal mentoring program designed for organizational newcomers scored lower on self-efficacy and self-monitoring and higher on emotional stability than did those who chose not to participate. Self-efficacy increased for these participants during the same time period in which self-efficacy dropped for those choosing not to participate.

**164-4. Positive and Negative Mentoring
Experiences: Impact on Protégé Outcomes**

This study examined the impact of positive mentoring and negative mentoring on protégé outcomes. Results revealed that negative mentoring experiences, specifically those that are maliciously motivated, are more predictive of protégés' intentions to leave the mentoring relationship and stress than positive mentoring. Implications for practice and research are discussed.

**166-1. Understanding the Existence of Groups:
Developing a Measure of Entitativity**

This paper develops a measure of entitativity—a construct recently popularized in social psychology that relates to the degree that a group is viewed as a coherent social entity. We provide single and multilevel convergent validity in the form of relationships between group cohesion, group identity, and climate strength.

166-3. Prevalence of Proactive Acculturation Behaviors Among a Representative Random Sample

The prevalence of proactive socialization behaviors aimed at learning organizational values was assessed among a representative sample of working adults. Results show prevalence differences across behaviors in general, across occupational types, and over time; however, within-person behavioral consistency was high. Only directly asking questions of superiors impacted acculturation.

166-4. Improving the Launch of Self-Managed Teams With a Process Intervention

We examined whether a process intervention provided to self-managed teams at project "launch" would enhance quality of performance and members' affective reaction to the experience. We found that our intervention did lead to teams paying more attention to processes. Teams that attended more to processes also had better team outcomes.

Submitted by Laura Parks, laura-parks@uiowa.edu

170-23. Emotional Labor: The Effect of Individual Characteristics on Consequences

This study examined the impact of individual characteristics on the consequences of emotional labor. Healthcare workers were surveyed to determine the effect of self-monitoring, role internalization, and faking in good faith/bad faith on emotional exhaustion and job satisfaction. Results supported an integrative model that helps resolve discrepancies in previous research.

Submitted by Laila Beaven, lbeaven@eidetikinc.net

170-24. Exploring the Dispositional Source of Risk Preference

The current study examined relationships between personality and preferences for risk. Contrary to the assumption that preferences are subject only to situational contingencies, we asserted that the risk assessments may have a dispositional source. Results suggest that risk preferences are consistent across context and are strongly associated with individual differences.

Ronald F. Piccolo, University of Central Florida
Beth Livingston, University of Florida
Pauline Schilpzand, University of Florida
Timothy A. Judge, University of Florida

Submitted by Ronald F. Piccolo, rpiccolo@bus.ucf.edu

170-25. Taxometric Investigation of the Latent Structure of Personality

This study investigated the latent structure of Extraversion Introversion (EI) personality. Meehl's taxometric techniques such as MAXCOV reveal that the structure of personality is best explained along a continuum rather than as discrete types. Additional correlational analyses yielded stronger predictive relationships with a dimensional measure of personality. Implications are discussed.

Submitted by Carrie L. Kersell,
carrie.kersell@safeway.com

170-26. Five-Factor Model of Personality and Job Satisfaction: Results from Singapore

With Asian study participants, this research replicates Judge et al's (2002) meta-analytic findings that the Big 5 traits Extroversion, Neuroticism, and Conscientiousness are related to job satisfaction. In addition, this study informs that in Asian collectivistic societies Agreeableness might play a more prominent role in affecting job satisfaction than in the West.

Klaus J. Templer, Nanyang Technological University

Submitted by Klaus J. Templer, akjtempler@ntu.edu.sg

170-27. Locus of Control and Work, Career, and Personal Outcomes

This study meta-analyzed the relationships between locus of control and work, career, and personal outcomes. Variables were categorized according to 3 theoretical perspectives: locus of control as well-being, as motivation, and as behavioral orientation. Hypotheses reflecting these 3 perspectives were proposed. We found support for these hypotheses in a meta-analysis.

Thomas Ng, University of Georgia
Kelly Sorensen, University of Georgia
Lillian T. Eby, University of Georgia

Submitted by Thomas Ng, twhng@uga.edu

170-28. The Effects of Personality on Individuals' Earnings

Personality was shown to predict earnings measured 6 years apart. The mechanism was explored through the mediating effect of individuals' leadership role occupancy. Results indicated partial mediation, and those high in the personality trait of social potency had higher earnings than those low, even when they occupied similar leadership positions.

BIGBY·HAVIS
AN ASSESS SYSTEMS COMPANY

Expert psychology. Elegant technology. Dedicated service.

We are an international company helping our clients with state-of-the-art solutions to meet their selection and development needs. Our focus is on people:

- which ones to hire or promote
- how to train and develop them to their fullest potential
- how to organize them and the systems around them to maximize their collective potential

EXPERTISE:

Competency Modeling Executive Assessment and Coaching Custom Test Validation Competency-based Feedback Culturally Adapted, Validated Assessments Online 360 Selection Process Design Interviewer Training Developmental Workshops Development Program Design	Selection Solutions: range from individual assessment to pre-employment testing tools to large-scale web-enabled hiring processes that include standard and customized assessments.	We provide focused support for your internal initiatives, and broader, more comprehensive offerings.
	Development Solutions: range from high-touch individual coaching to developmental workshops to succession planning and team development consultation--all with a web-based assessment foundation.	Our objective is to provide solutions that are tailored to the specific needs of each client company.

Certification Workshops: We provide training to other consultants and to our human resource partners to facilitate the best use of our systems in organizations. **Visit our booth to learn about becoming a certified facilitator.**

Pay for Results, Not Expensive Overhead

From developing custom solutions to filling I/O position openings, Campion Services, Inc. continues its tradition of meeting needs and exceeding expectations at rates unburdened by excessive overhead of larger firms.

Campion Consulting Services

We combine scientific research and practical experience to create cost-effective, real-world solutions that are specifically tailored to each client's unique needs. We do not sell a limited set of products, but we instead design custom solutions for each situation. We take pride in delivering workable, real-world solutions based on state of the art practices and scientific research to all of our client organizations.

To date, we have enhanced over 80 private and public sector organizations by performing over 300 projects in a broad range of areas, including:

- Custom Selection Tests and Assessments
- Structured Interviews
- Performance Management
- Opinion Surveys
- Job Analysis
- Individual Assessment
- Turnover Management
- Litigation Support and Expert Witness Testimony
- Work/Team/Organizational Design
- Compensation and Reward Systems
- Skill and Career Development
- Management Development
- Validation and Legal Defensibility
- Personnel Research

Campion Recruiting Services

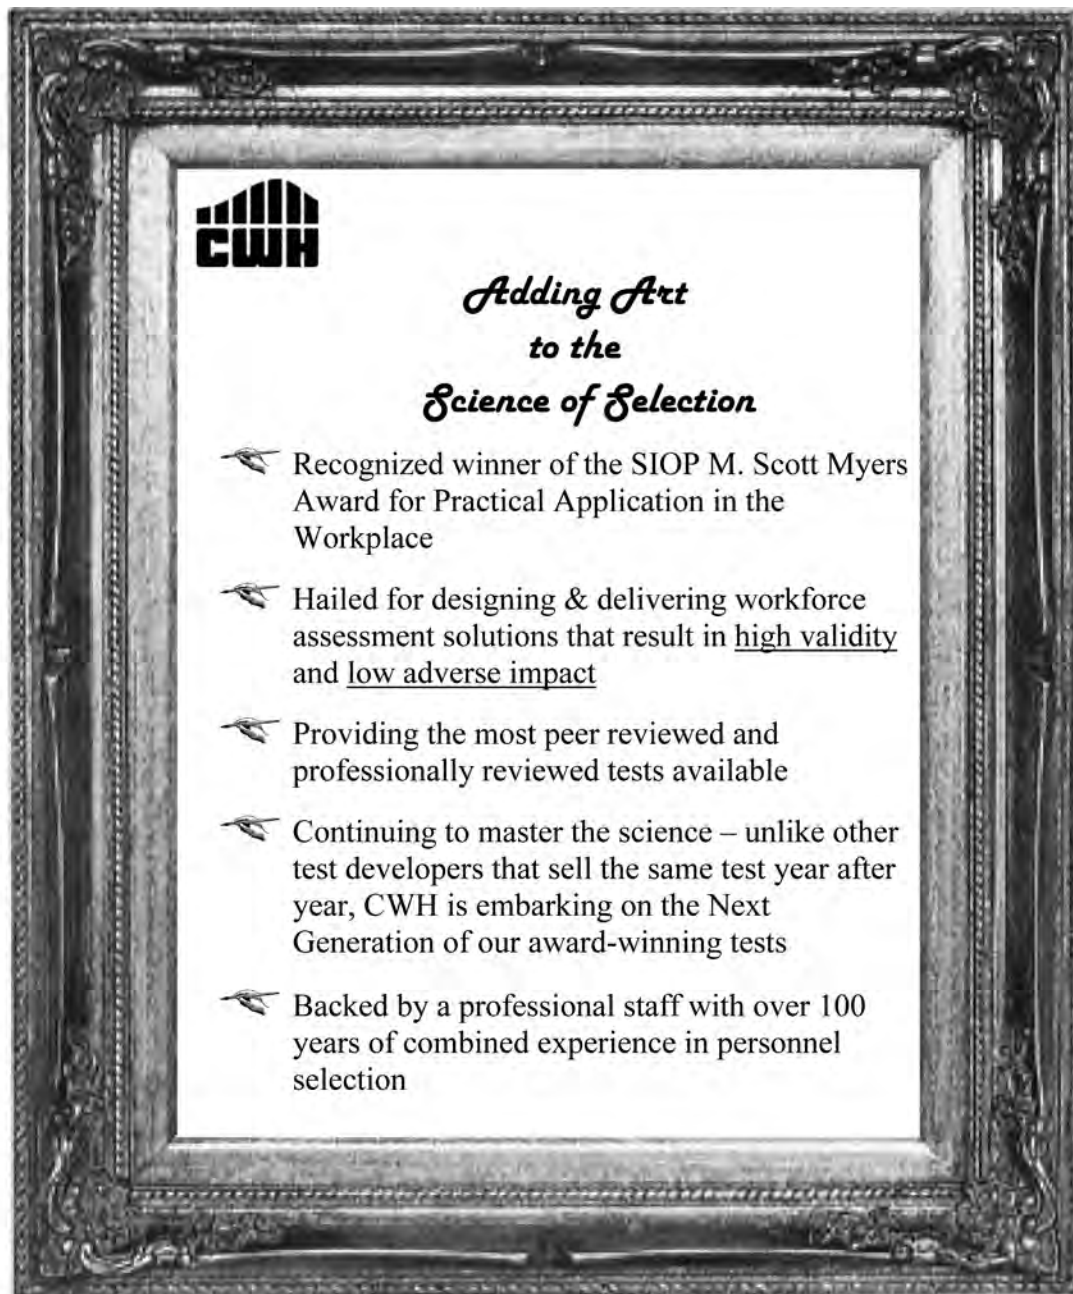

The premiere I/O recruiting firm, now in our ninth year. Campion Recruiting Services specializes solely in filling job openings in I/O psychology. We have filled over 40 jobs in consulting firms, corporations, and government agencies.

EMPLOYERS: With our database of over 2,500 I/O professionals, we are able to find top quality candidates – those who are having highly successful careers elsewhere and do not read job ads. This gives you the best candidates, not just candidates looking for work. Also, we search for the top candidates, not just adequate candidates because we have most of the people in the profession in our data base.

PROFESSIONALS: Please send us a resume if you have not done so recently because even if you are happy where you are, there may be a better opportunity out there. We promise not to share your resume without talking to you first. Please e-mail us or visit us in the placement center here at the conference.

Organizational Behavior from *M.E. Sharpe*

Organizational Behavior 1: Essential Theories of Motivation and Leadership

John B. Miner

"It is impossible to read Miner's original insights without having one's understanding of motivation and leadership theory permanently and dramatically widened. ... This is vintage Miner, Miner at his best."

— Arthur G. Bedeian,
Louisiana State University

432 pages
0-7656-1523-1 Cloth \$104.95 / 1524-X Paper \$49.95

Organizational Behavior 2: Essential Theories of Process and Structure

John B. Miner

"This review of organizational process and structure is exemplary in its range of theories and depth of discussion. It is a highly valuable guide and is stimulating reading."

— Lex Donaldson, Australian
Graduate School of Management

464 pages
0-7656-1525-8 Cloth \$99.95 / 1526-6 Paper \$49.95

Organizational Behavior 3: Historical Origins, Theoretical Foundations, and the Future

John B. Miner

This is the first comprehensive overview of the development of the field of Organizational Behavior.

336 pages
0-7656-1527-4 Cloth \$89.95 / 1528-2 Paper \$39.95

I-deals: Idiosyncratic Deals Employees Bargain for Themselves

Denise M. Rousseau

"A must read for HR executives and scholars concerned about the problem of balancing the need to attract and keep talented people with the equally important need to maintain

justice and prevent the erosion of trust and commitment." — Michael Beer,
Harvard Business School

"Denise Rousseau is the world's leading expert in the field of psychological contracts in organizations and she has struck gold in this 'must read' by all employers and employees."

— Cary L. Cooper, Lancaster University
(U.K.); Past President,
British Academy of Management

280 pages
0-7656-1042-6 Cloth \$79.95 / 1043-4 Paper \$29.95

Leadership

Succeeding in the Private, Public, and Not-for-Profit Sectors

Edited by
Ronald R. Sims and Scott A. Quatro

"Valuable reading and should not be missed!"

— Ken Blanchard,
co-author, *The One Minute Manager* and
The Secret

"It allows readers to explore a wide variety of contexts as a means of gaining a deeper understanding of leadership. Highly recommended." — *Choice*

448 pages
0-7656-1429-4 Cloth \$99.95 / 1430-8 Paper \$43.95

The Dance of Leadership

The Art of Leading in Business, Government, and Society

Robert B. Denhardt and Janet V. Denhardt

"If you are looking for a book that challenges your assumptions about leadership, and is really about 'hard' skills, read this one."

— Thomas Downs,
former CEO,
AMTRAK

"*The Dance of Leadership* evokes the artist within each of us in a way that makes leadership natural and accessible to all."

— James Keene, California
State Association of Counties

Organizational Behavior from *M.E. Sharpe*

Managing Power and People

George J. Seperich and Russell W. McCalley

Including learning objectives, discussion questions, and numerous case studies, this practical text offers management students as well as professionals a comprehensive guide to the use of power and authority to achieve specific objectives. An online Instructor's Manual is available to instructors who adopt the text.

280 pages
0-7656-1603-3 Cloth \$68.95 / 1604-1 Paper \$32.95

Organizational Dynamics and Intervention

Tools for Changing the Workplace
Seth Allcorn

"This is possibly the best book in print on understanding and working effectively with the psychodynamics of everyday organizational life."

— Michael A. Diamond,
University of Missouri

"A wonderfully fluent, evocative, readable book on the unconscious dynamics of workplace experience—an often overlooked dimension of what an organization 'is.' It deserves to be widely read and used as a classroom text." — Howard F. Stein,
University of Oklahoma

256 pages
0-7656-1519-3 Cloth \$72.95 / 1520-7 Paper \$29.95

Theories of Macro-Organizational Behavior

A Handbook of Ideas and Explanations
Conor Vibert

"Professor Vibert offers an excellent overview and summary of the field of organization theory. This text will provide a valuable reference resource for graduate students and practitioners in the field."

— Roy Suddaby, University of Iowa

240 pages
0-7656-1294-1 Cloth \$68.95 / 1295-X Paper \$26.95

International Perspectives on Organizational Behavior and Human Resource Management

Betty Jane Punnett

"What makes this book valuable is Punnett's ability to draw on a diverse selection of references and anecdotes (classic and eclectic) to illustrate her points in a well-thought-out manner. ... Highly recommended. Upper-division undergraduate through professional collections."

— *Choice*

304 pages
0-7656-1057-4 Cloth \$89.95 / 1058-2 Paper \$38.95

Handbook of Workplace Spirituality and Organizational Performance

Edited by Robert A. Giacalone and Carole L. Jurkiewicz

"A landmark in the emergence of a new paradigm that holds great promise of bringing into the realm of scientific inquiry that which has traditionally been the domain of theology."

— *Academy of Management Executive*

544 pages 0-7656-1743-9 Paper \$39.95

Organizational Influence Processes

Second Edition

Edited by Lyman W. Porter,
Harold L. Angle, and Robert W. Allen

"An interesting, comprehensive, and useful look at influence processes in organizations. This book should be required reading in OB courses in MBA and Executive programs, helping managers harness organizational processes to facilitate dynamic, responsive, and competitive organizations." — Richard M. Steers,
University of Oregon

576 pages
0-7656-1134-1 Cloth \$104.95 / 0999-1 Paper \$54.95

The Strategic Use of Stories in Organizational Communication and Learning

Terrence L. Gargiulo

"Managing corporate communications involves navigating a labyrinth of people, messages, and channels. Terrence Gargiulo shows us how to put the universal power of stories to work in our organizations, with strategies, models, interesting case studies, and research. He also provides useful exercises and practical advice that can be applied right away."

— Angelo S. Ioffreda, Sodexho USA

272 pages
0-7656-1412-X Cloth \$68.95 / 1413-8 Paper \$25.95

171. Practice Forum: Saturday, 12:00–1:20 San Antonio A (3rd floor-CC)

Improving the Use and Usefulness of Multisource Comments

The use of comments in multisource feedback is relatively understudied compared to work on quantitative ratings. Presenters explore several different means of improving the use and usefulness of comments, including identifying characteristics of “helpful” comments, presentation of summary quantitative ratings before offering comments, and automated content coding technology.

172. Symposium: Saturday, 12:00–1:20 San Antonio B (3rd floor-CC)

The Evolution and Utilization of Personal Resources in Self-Regulation

Personal resources, such as time, effort, and emotions, are critical factors in work motivation. Utilizing a variety of within-person methodologies, the studies in this symposium examine the development and evolution of self-regulatory resources over time, as well as the application of resources towards the attainment of single and multiple goals.

173. Symposium: Saturday, 12:00–1:20 Houston C (3rd floor-CC)

Revising the Five-Factor Model: A New Six- Dimensional Model of Personality

The 5-factor model has recently been disputed based upon new evidence from lexical studies of personality structure, which suggests that there are 6 (not just 5) cross-culturally replicable personality dimensions. A resulting 6-dimensional model of personality is discussed and some applications of the model in I-O psychology are presented.

**Making the Move From Psychology to
B-Schools: Issues to Consider**

There is an increasing trend for I-Os to move from psychology departments to business schools. This panel includes 5 who made “the switch” (all as junior faculty in the past 5 years) and 1 who is seriously concerned about this trend. This session will focus on answering the audience’s questions.

Deidra J. Schleicher, Purdue University, *Chair*
Gary J. Greguras, Singapore Management University,
Panelist

Scott Highhouse, Bowling Green State University, *Panelist*
Michelle A. Marks, George Mason University School of

**186. Symposium: Saturday, 12:30–1:50
Lone Star C1 (2nd floor-CC)**

**Toward Better Understanding and
Measurement of Emotional and Social
Intelligence**

The papers in this symposium describe recent emotional and social intelligence research. Advances in measurement and understanding of these related constructs will be described, including evaluation of the incremental validity of 3 new EI measures, a taxonomy of social competence constructs, and a theory of antecedents of social work performance.

190. Practice Forum: Saturday, 12:30–1:50 Austin 3 (2nd floor-H)

Measuring Organizational Productivity Using ProMES (Productivity Measurement and Enhancement System)

Given the importance of capturing the performance domain at different organizational levels, the Productivity Measurement and Enhancement System (ProMES) is an intervention that provides comprehensiveness and flexibility of measurement. Practitioners from the United States and Europe will discuss applications of ProMES in different organizational settings.

191. Panel Discussion: Saturday, 12:30–1:50 Majestic 1 (37th floor-H)

Publishing in *Psychological Bulletin*, *Psychological Review*, etc.: Strategies and Tactics

Many I-O scholars are interested in publishing in broad psychology journals but are unsure how to do so. Experience with the publication processes of such journals shows that there are important differences between the broader and the disciplinary journals. The purpose of this session is to highlight those differences and to consider strategies for overcoming them.

Jose M. Cortina, George Mason University, *Chair*

192. Symposium: Saturday, 12:30–2:20 Majestic 4-5 (37th floor-H)

Adaptation, Withdrawal, and Turnover: Current Issues and Directions

This symposium presents current directions in the prediction and measurement of withdrawal and turnover. The research presented focuses primarily on newcomer adaptation/withdrawal, unit-level withdrawal, and job embeddedness. These empirical studies move beyond the traditional emphasis on job satisfaction and job alternatives to explore more complex constructs and issues.

Safety

Cecily D. Cooper, University of Miami, *Facilitator*

193-1. Corporate Financial Decision Makers' View of Safety

This study explored how senior financial managers perceive important risk management issues. The top 3 reported safety priorities and workers' compensation losses are overexertion, repetitive motion, and bodily reaction. Money spent improving workplace safety would have significant returns and the most important safety modification was safety training.

 Institute for Safety

Submitted by Yueng-Hsiang E. Huang,
 yueng-hsiang.huang@Libertymutual.com

193-2. An Investigation Into the Generic Factor Structure of Safety Climate

There is continuing debate regarding the existence of generic safety climate characteristics. The current study conducted a comprehensive assessment of existing safety climate measures. No evidence was found to support a common structure, with 74 different factors identified. The possibility of generic factors existing at industry-specific level is discussed.

Sharon Clarke, The University of Manchester
 Christine Flitcroft, The University of Manchester

Submitted by Sharon Clarke,
 sharon.clarke@manchester.ac.uk

193-3. Personal Values and the Safety Climate–Safety Behavior Relationship

The role of personal values in the safety climate–safety behavior relationship has often been omitted in research. We investigated the function of individualism in this relationship. Results indicated that there is a moderating effect of individualism on the relationship between safety climate and safety behavior.

 Rhona Flin, University of Aberdeen

Submitted by Catherine Hetherington,
 c.hetherington@abdn.ac.uk

193-4. Improving Safety Outcomes: A Multilevel Analysis

We investigated the relationship between safety-related accidents and leadership support, workgroup cohesion, and location size. A multilevel mediation model was tested using hierarchical linear modeling and OLS regression. As expected, location size predicted variance in safety attitudes. Further, safety attitudes and management supportiveness were associated with safety behaviors.

Work & Family

**195-1. Personality and Separation Anxiety in
 Employed Mothers**

Personality traits of the 5-factor model and 3 separation concerns (maternal separation anxiety, concern about effects on child, and employment-related concerns) were examined in employed mothers. Several significant relationships were detected, suggesting that separation concerns may be systematically linked with dispositional characteristics. Applications and future research are discussed.

Deborah A. Danzis, High Point University

Submitted by Deborah A. Danzis,
 ddanzis@highpoint.edu

**195-2. A Longitudinal Study of Faculty
 Pregnancy Leave Practices: 1995–2005**

Unique factors in the academic setting (e.g., tenure track, the semester time frame, etc.) complicate policies governing pregnancy leave. This paper reports a longitudinal (1995–2005) case study of faculty pregnancy leave practices in a public southeastern university. The data address options for covering pregnancy leave, the perceived fairness and willingness of department heads to use these options, as well as a comparison of practices across time. The results of this study provide timely and useful data to inform department heads, deans,

and faculty members as they determine which options to utilize for class coverage for pregnancy leave.

**195-3. Effects of Gender Match on Leader–
 Member Exchange and Work–Family Conflict**

A structural equation model examined the relationships among supervisor gender, supervisor-subordinate gender match, leader–member exchange (LMX), and work–family conflict (WFC). Gender match had significant main effects on LMX and WFC, although the sign of the relationships was unexpected. LMX also partially mediated the relationship between gender match and WFC.

Shannon K. Meert, Old Dominion University
 Debra A. Major, Old Dominion University

Submitted by Shannon K. Meert, smeert@odu.edu

**195-4. Work and Home Boundary
 Management: Testing the
 Segmentation–Integration Continuum**

We investigated boundary management profiles of 251 workers in a test of the segmentation–integration continuum. Results indicate consistent clusters of boundary management practices related to preferences for segmentation and integration of the work–home domains. Results also indicate relationships between boundary management practices and work–personal life interference and work–personal life enhancement.

 Mark E. Hoffman, Quinnipiac University

Submitted by Carrie A. Bulger,
 carrie.bulger@quinnipiac.edu

**195-5. Work-Induced Guilt and Conservation of
 Resources on Satisfaction**

We conducted 2 studies to examine the work-induced guilt–conservation of resources (COR) relationship on job and life satisfaction. Results indicated that COR moderated all guilt–satisfaction relationships, such that the inability to manage resources contributed to lower levels of satisfaction as guilt increased from low to high levels.

Wayne A. Hochwarter, Florida State University

 James Meurs, Florida State University
 Lawrence A. Witt, University of New Orleans

Submitted by Pamela L. Perrewe, pperrew@cob.fsu.edu

195-6. Work–Family Conflict: Work Group Crossover and Work Group Similarity

The crossover effects of the work group's work–family conflict (WFC) on individual WFC were examined. We find evidence of such crossover effects with a positive relationship between work group WFC and individual WFC. Further, similarity in both gender and number of dependents moderate this relationship.

Devasheesh Bhawe, University of Minnesota
 Amit Kramer, University of Minnesota
 Theresa M. Glomb, University of Minnesota

Submitted by Devasheesh Bhawe, dbhave@csom.umn.edu

195-7. International and Multisource Perspectives on Work–Life Balance and Career Derailment

We examined whether managers high in work–life balance might be perceived as more or less likely to derail in their careers than less balanced and perhaps more work-focused managers. We analyzed multisource ratings for 6,164 managers in 22 countries and tested gender and country values as moderators of the relationship.

Karen S. Lyness, Baruch College, CUNY
 Michael K. Judiesch, Manhattan College

Submitted by Karen S. Lyness,
 karen_lyness@baruch.cuny.edu

195-8. Pruning of the Work–Family Climate Construct

Work–family culture, perceived organizational family support (POFS), and family-supportive organizational perceptions (FSOP) were analyzed with factor analysis to determine the overlap and distinctiveness of the work–family climate construct. Results support a 6-factor construct: top management/organizational family support, immediate supervisor family support, tangible support, segmentation, negative career consequences, and time demands.

Beth A. Heinen, George Mason University
 Lois E. Tetrick, George Mason University

Submitted by Beth A. Heinen, bethheinen@gmail.com

195-9. Polychronicity as a Mediator of the Multiple Roles–Overload Relationship

Polychronicity was hypothesized to moderate the curvilinear relationship between involvement in multiple life roles and role overload. Results suggest that as people spend more time on roles, they experience exponentially more overload, and this relationship is more severe for those high in polychronicity.

Beth A. Heinen, George Mason University

Submitted by Beth A. Heinen, bethheinen@gmail.com

195-10. Comparing the Efficacy of Various Work–Family Conflict Measures: A Meta-Analysis

Work–family conflict is a common stressor that can cause significant problems for employees, organizations, and families. Research on this phenomenon has flourished, yet, there have not been any attempts to summarize the findings of these studies. The purpose of this meta-analysis was to compare 4 common measures of work–family conflict.

Sara Janssen Langford, Central Michigan University
 Misty M. Bennett, Central Michigan University
 Stephen H. Wagner, Central Michigan University

Submitted by Sara Janssen Langford,
 sara.langford@cmich.edu

195-11. Correlates of Family-Supportive Benefits: A Meta-Analysis

This study summarizes the relation of family-supportive benefits with work–family conflict, stress, job satisfaction, and social support. Findings indicate that the benefit–conflict and benefit–stress relations, corrected for sampling error and measurement unreliability, are modest and negative. Correlations with satisfaction and support are somewhat stronger and positive.

Jennifer Lee Gibson, George Mason University
 Laura Wheeler Poms, George Mason University

Submitted by Jennifer Lee Gibson, jles@gmu.edu

195-12. Does Autonomy at Work Make You Happy at Home?

The relation between job autonomy and work–family facilitation (WFF) was assessed using 3 facets of autonomy (work method, work scheduling, and work criteria). Results supported the notion that employees in autonomous jobs experience more WFF. Consistent with work–family balance theory, autonomy was a stronger antecedent of WFF than work–family conflict.

Kristina Renee Miller, University of Houston
Emily M. Hunter, University of Houston
Dana M. Glenn, University of Houston
Christiane Spitzmueller, University of Houston

Submitted by Kristina Renee Miller,
krmiller@mail.uh.edu

195-13. Transitioning Between Work and Family: Why the Commute Matters

We examined whether the interaction between commute length, one's preference for segmenting life roles, and work time mitigates job dissatisfaction and work-to-family conflict. Results suggested that a match between segmentation preference and commute length buffers against decreases in job satisfaction for individuals working longer than average per week.

Stephanie Alton, University of Connecticut
Jennifer Bunk, University of Connecticut
Janet L. Barnes-Farrell, University of Connecticut

Submitted by Stephanie Alton,
stephanie.alton@uconn.edu

195-14. Telework and Work–Family Conflict: The Role of Interruptions and Support

We examined the relationship between telework and work–family conflict. The mediating effect of interruptions and moderating effect of supervisor support were also examined. Results suggest telework is positively related to work–family conflict, and interruptions partially mediate this relationship. Supervisor support was not found to moderate the interruptions–conflict relationship.

Jaime B. Henning, Texas A&M University
Ann H. Huffman, Northern Arizona University

Submitted by Jaime B. Henning, jhenning@tamu.edu

195-15. Assessing Applicant Fit: Combining Individual, Job, and Organizational Characteristics

This study examined the manner by which applicant (parental status), job (gender stereotypes), and organizational (family friendliness) characteristics are combined when evaluating job applicants. Results were consistent with more favorable perceptions of applicants in higher-fit situations (e.g., female applicants with children in stereotypically feminine jobs in family-friendly organizations).

Allison Cook, Texas A&M University
Jessica Bigazzi Foster, Purdue University

Submitted by Jessica Bigazzi Foster, jfoster@purdue.edu

195-16. Actual–Desired Time Discrepancies in Work, Family, and Personal Domains

Employees at a midsize university ($n = 396$) completed a survey assessing actual versus desired time spent in work, family, and personal domains, subjective WFB, and well-being. Discrepancies between actual and desired time in domains were significantly related to well-being, with the effects for family discrepancy being mediated by subjective WFB.

195-17. Individual Differences and Perceived Organizational Support: Predictors of Work–School Conflict

This study found evidence to support the consideration of both individual differences and contextual factors in predicting work–school conflict. Neuroticism was positively related and perceived organizational support was negatively related to work–school conflict. POS also offered incremental prediction of work–school conflict over and above Big 5 personality variables.

Laura Wheeler Poms, George Mason University
Jennifer Lee Gibson, George Mason University

Submitted by Laura Wheeler Poms, lpoms@gmu.edu

195-18. A Review of Several Measurement Issues in Work–Family Conflict Research

This research reviews 119 studies of work–family conflict (WFC) published in IO/OB journals over 25 years (1980–2004). The use of validated WFC scales, the type and direction of WFC measured, and the utilization of covariates, moderators, and mediators in this literature were examined. Results support several criticisms of WFC research.

Submitted by Ann-Renee Blais,
Ann-Renee.Blais@drdc-rddc.gc.ca

195-20. Effects of Work Schedule Fit: A Test of Competing Hypotheses

The relationship between individuals' work schedule, their amount of time at work, and distress outcomes has not been clearly delineated. Results of this study indicate that work schedule fit mediates the relationship between work hours and work interference with family. Benefits of work schedule fit are also discussed.

Matthew D. Tuttle, University of South Florida
Tammy D. Allen, University of South Florida
Submitted by Matthew D. Tuttle, mtuttle2@mail.usf.edu

195-21. Continuing the Investigation Into Personality Traits and Work–Family Conflict

Demographic antecedents for each work–family conflict type have been investigated extensively, and personality based explanations are becoming increasingly important. Negative affectivity has been found to have a much broader impact on work–family conflict than the traditional 5-factor model personality characteristics. Demographics still have an important role in work–family conflict.

David Stewart, University of Tulsa
Submitted by David Stewart, david-stewart@utulsa.edu

195-22. Commitment and Work–Family Interface: Predictions From Socioemotional Selectivity Theory

The current study evaluates the role of future time perspective in the effects of work–family conflict on continuance and affective commitment. Results indicate that employees with a shorter future time perspective experience greater affective commitment and lower continuance commitment when work interfered with family and family interfered with work, respectively.

195-23. Examining Mediators of the Telework/Work–Family Conflict Relationship

The purpose of this study was to examine the relationship between telecommuting status and work–family conflict (WFC). Results indicated that telecommuters experienced significantly more WFC, and this relationship was mediated by the number of hours worked and the frequency of interruptions. Additional analyses include comparisons of full- and part-time teleworkers.

Jane Wu, Purdue University
Jessica Bigazzi Foster, Purdue University
Submitted by Jessica Bigazzi Foster, jfoster@purdue.edu

195-24. It's Not Just About Sex: Gender-Specific Roles Predict Work-Family Conflict

Equivocal findings exist regarding the relationship between sex and work-family conflict. We propose that sociocultural rather than biological conceptualizations of gender might be better predictors of work-family conflict. The results of 2 samples confirm that gender roles, but not biological sex, are related to work-family conflict.

202. Symposium: Saturday, 1:30–2:50 State Room 4 (3rd floor-CC)

New Directions in Organizational Safety Climate Research

Researchers are increasingly recognizing the importance of organizational safety climate in predicting individual- and organization-level safety-related outcomes at work. This symposium presents the latest research exploring the relationships between safety climate and safety motivation, under-reporting of occupational injuries, behavioral intentions, and support for organizational safety initiatives.

203. Symposium: Saturday, 1:30–2:50 Lone Star C3 (2nd floor-CC)

The Four “Rs” of 360° Feedback: Determinants of Its Effectiveness

Regardless of its purpose, the effectiveness of 360° feedback is based on a complex interaction of raters, ratees, ratings, and results. Four research projects will provide further insight into improving 360° effective-

ness, addressing: (a) rater training, (b) rating scales, (c) ratee personality, and (d) supervisory effectiveness.

1:30–2:20
Majestic 8 (37th floor-H)**

**CEMA Sponsored Interactive Poster Session:
Barriers to Achieving a Diverse Workforce**

Derek Avery, Rutgers University, *Facilitator*

**209-1. Glass Ceiling: Lawsuit Threats Influence
Decisions for Top Jobs**

There is still a lack of representation by women and ethnic minorities in the highest positions in business organizations. In the absence of evidence of sexist or racist motives, or perhaps included along with those, discrimination may be occurring for reasons of self-protection fueled by a fear of litigation.

Wendy S. Harman, University of Washington
Terence R. Mitchell, University of Washington
Gregory A. Bigley, University of Cincinnati

Submitted by Wendy S. Harman,
wendysue@u.washington.edu

**209-2. Manager–Subordinate Racial Similarity
and Work Outcomes: Examining Possible
Moderators**

Because previous research on outcomes of manager–subordinate racial similarity has yielded inconsistent results, we examined possible moderators of the similarity–outcome relationship. Results showed some support for subordinate racial/ethnic identity, other-group orientation, and perceived diversity climate as moderators of the relationship between similarity and 2 outcomes, subordinate job satisfaction and LMX.

Cheemen J. Mohammed, CVS Pharmacy
Mark G. Ehrhart, San Diego State University
Meredith Czerwinski, San Diego State University

Submitted by Mark G. Ehrhart,
mehrhart@sunstroke.sdsu.edu

**209-3. Analyzing Judgments of Ethnically Diverse
Applicants: Dutch Police Selection Findings**

A judgment-analysis study was used to investigate differences between assessors' decision making, evaluating ethnic minority versus ethnic majority applicants. Results showed that, to judge ethnic minority applicants, assessors used more irrelevant information. Also, assessors based their decisions to a lesser extent on their own ratings than on ratings by others.

Leadership

**211-1. Understanding, Predicting, and Supporting
Performance of Leader Self-Development**

Systematic research was performed to better understand and support individual professional self-development. Over 400 junior military leaders participated in a detailed study to test a structural model of leader self-development. Results provide a unifying framework for understanding the effects of individual characteristics and organizational support on self-development performance.

Lisa A. Boyce, U.S. Air Force Academy

Submitted by Lisa A. Boyce, Boycela@msn.com

211-2. Charismatic Leadership Development: Role of Work Values

Little research has examined the development of charismatic leaders. This study examined the relationship between emergent adults' work values and charismatic leadership. Dominance was positively related to charismatic leadership and competitiveness was negatively related. Those who were rated as charismatic were also ranked as being the most effective leaders.

Annette Towler, Illinois Institute of Technology

Submitted by Annette Towler, towler@iit.edu

211-3. Leadership Competencies and Organizational Outcomes: A Longitudinal Study

We examined the effect of leadership competencies on outcomes from 62 health care facilities. Participants completed a measure that assessed their supervisors' levels of leadership. Over 12 months, participants completed a job satisfaction measure. Firm performance data were collected. Leadership competencies were related to job satisfaction and to firm performance.

Annette Towler, Illinois Institute of Technology

Timothy Britt, Illinois Institute of Technology

Submitted by Annette Towler, towler@iit.edu

211-4. The Effects of Gender on Perceptions of Emergent Leaders

The present study examined the perceptual processes in leadership emergence using a dynamic nonlinear method and organizational members. Results showed that both male and female participants needed to observe a greater number of leadership behaviors before recognizing a woman as an emerging leader, as compared to a man.

Rachel Backert, Virginia Tech

Roseanne J. Foti, Virginia Tech

Submitted by Roseanne J. Foti, rfoti@vt.edu

211-5. Regulatory Focus Fit: Influences on Leader-Member Exchange

The present research proposed that regulatory focus fit between supervisors and subordinates would predict leader-member exchange (LMX) quality. We found that only subordinate's chronic self-regulatory mechanisms predicted LMX. Thus, the situation appears to have more influence on LMX than supervisor individual differences.

Megan Medvedeff, University of Akron

Robert G. Lord, University of Akron

Submitted by Megan Medvedeff, mem39@uakron.edu

211-6. Follower Self-Concept Activation as the Process Underlying Leadership Effects

The current study adopts a process-oriented, follower-centered approach to examine leadership effects. Experimental results supported that leaders are able to activate followers' individual or collective self-identity levels depending on the types of goals and values they emphasized. This follower self-concept activation had subsequent motivational, affective, and cognitive consequences.

Chu-Hsiang Chang, Roosevelt University

Rosalie J. Hall, University of Akron

Russell E. Johnson, University of Akron

Submitted by Chu-Hsiang Chang, changc1@rcn.com

211-7. Effects of Leader Emotion and Response on Evaluations of Leadership

This research examined how a leader's emotion and response influences how a leader is evaluated in times of crises. Results revealed that a leader expressing sadness was evaluated more favorably than a leader expressing anger. Furthermore, accepting responsibility for the crisis lead to more favorable evaluations than not accepting responsibility.

Juan Madera, Rice University

D. Brent Smith, Rice University

Submitted by Juan Madera, jmadera@rice.edu

211-8. Managing Dreams and Ambitions: Possible Selves and Visionary Leadership

In an experiment we show that visions that are specifically framed as possible selves motivate people more to accomplish these visions than visions that are not specifically framed as possible selves, even though their content is the same. Furthermore we find that chronic self regulatory focus moderates these effects.

Daan Stam, Erasmus University-Rotterdam

Daan van Knippenberg, Erasmus University-Rotterdam

Barbara van Knippenberg, Free University Amsterdam

Submitted by Daan A. Stam, dstam@rsm.nl

211-9. Social Responsibility, Ethical Leadership and Performance

The current multimethod study investigated antecedents and consequences of ethical leadership. The results showed the importance of managers' responsibility disposition in relation to ethical leadership. In addition, several components of ethical leadership are found to be important for organizational performance.

211-11. Building Shared Vision: Investigating the Importance of Value Congruence

This study investigates follower perceptions of value congruence and shared vision. Survey data was collected from employees at 3 companies with published vision statements. Results indicate that follower's who perceive dissonance between the vision and the leader's values report more organizational cynicism, uncertainty, and weaker perceptions of shared vision.

Melissa K. Carsten, Claremont Graduate University

Submitted by Melissa K. Carsten, melissa.carsten@cgu.edu

211-12. Extending Socialized Charismatic Leadership Research: A Theoretical Model Integrating Humility

We offer theory proposing humility as an important but overlooked antecedent to effective socialized charismatic leaders. Building upon sociological literature, humili-

ty prevents excessive self-focus and allows for accurate assessments of oneself, others, and the environment. The effects of humility on the display and effectiveness of charismatic leader behaviors are considered.

Rob Nielsen, Seattle University
Jennifer A. Marrone, Seattle University

Submitted by Jennifer A. Marrone, marronej@seattleu.edu

211-13. Implicit Leadership Theories: An Investigation of Performance Cue Influence

Two experiments were conducted to determine if implicit leadership theories (ILTs) consistent with performance cues could be elicited. ILT responses were influenced only when respondents were asked specifically about a leader. Results suggest that respondents modify existing ILTs to incorporate performance information.

211-24. Examining the “Process” of Transactional Leadership: An SEM Approach

We tested a model of the relationships between leader contingent/noncontingent reward and punishment behaviors, employee perceptions of fairness, job attitudes, trust in the leader, and employee outcomes. Using a sample of 546 manufacturing employees, the results generally indicated support for the fully mediated model.

Nathan P. Podsakoff, University of Florida
William Bommer, Cleveland State University

Submitted by Nathan P. Podsakoff, podsakof@ufl.edu

211-25. Impact of Rater Personality on Transformational and Transactional Leadership Ratings

This study links rater personality to ratings of leadership behaviors in both field and lab settings. High rater Agreeableness exhibited a leniency bias, providing high ratings on effective leadership behaviors and low ratings on

ineffective behaviors. Extraversion and Conscientiousness were also linked to elevated ratings for some dimensions.

Amy C. Hooper, University of Minnesota
Joyce E. Bono, University of Minnesota

Submitted by Amy C. Hooper, dies0018@umn.edu

211-26. Leadership Behaviors and Effectiveness in Context: The Case of Telecommuting

Followers perceive an increase in structuring behaviors, a decrease in considerate behaviors, and no changes in transformational behaviors when they telework or communicate with the leader via computer-mediated tools. Counts of actual leadership behaviors corroborate these findings. Outcomes, such as follower satisfaction and performance, are not affected by work arrangement.

Radostina Purvanova, University of Minnesota

Submitted by Radostina Purvanova, purva002@umn.edu

211-27. Virtual Team Leadership: Perspectives From the Field

This study sought to further understand virtual team leadership. Qualitative data was collected through interviews with virtual team leaders/members across organizations. Interviews yielded extensive information about virtual leadership behaviors. Results provide real-world examples of effective virtual team leadership, directions for future research, and practical recommendations for leading virtual teams.

217. Panel Discussion: Saturday, 3:30–5:20 San Antonio B (3rd floor-CC)

Understanding Employee Engagement: A Discussion of the Construct

A panel of researchers and practitioners discusses the current use of the popular new construct—employee engagement—in research and in practice. This discussion will focus on the nature of employee engagement and its place among the other job attitude constructs that are used to describe employees at work.

218. Conversation Hour: Saturday, 3:30–4:20 Houston A (3rd floor-CC)

A Conversation With the APA Ethics Director

Dr. Stephen Behnke, director of the APA Ethics Office, will lead a conversation about ethics in I-O psychology. The conversation will likely include discussion of ethical dilemmas, concerns associated with applying the APA ethics code in I-O psychology, as well as support Dr. Behnke's office can provide to SIOP members.

Stephen Behnke, American Psychological Association, **Host**

Submitted by Deirdre J. Knapp, dknapp@humro.org

219. Symposium: Saturday, 3:30–5:20 Houston B (3rd floor-CC)

New Directions in Emotional Labor Research

Emotional labor refers to the management of emotions and emotional displays as part of the work role. Five papers are presented that expand our understanding of emotional labor by exploring the complexity and contextualization of key emotional labor variables, as well as the roles of new moderators, mediators, and antecedents.

J. Craig Wallace, Tulane University, **Chair**

Aging

Joselito C. Lualhati, Global Skills X-Change, *Facilitator*

238-1. Meta-Analysis of Age/Job Performance Relation: Is Job Complexity a Moderator?

We conducted a meta-analysis on age and job performance with job complexity (based on the prevalence of variably mapped tasks/fluid intelligence versus consistently mapped tasks/crystallized intelligence) as a moderator. Results indicate job complexity moderates the relation between age and job performance. We conclude with theoretical and practical implications.

Anna Hardigree, Rice University
Margaret E. Beier, Rice University
Daniel J. Beal, Rice University

Submitted by Anna Hardigree, artemis@rice.edu

238-2. Successful Aging at Work: Testing a Structural Model of Adaptation

One of the biggest issues workers in midlife face is the ability to adapt to the rapidly changing workplace. Therefore, we developed and tested a structural model of adaptation particularly relevant to workers in midlife. Results indicated that reducing stress while increasing resources and support systems lead to successful adaptation.

Autumn Carroll, California State University-San Bernardino
Kenneth S. Shultz, California State University-San Bernardino

Submitted by Kenneth S. Shultz, kshultz@csusb.edu

238-3. Age, Ability, Prior Knowledge, and Personality in Learning

Ability and nonability determinants of knowledge of financial issues before and after self-study learning were investigated with a sample of 141 adults aged 18 to 69. Age and crystallized abilities were positively related to knowledge before and after learning. Results suggest benefit for older learners in self-paced learning environments.

Margaret E. Beier, Rice University
Phillip L Ackerman, Georgia Tech

Submitted by Margaret E. Beier, beier@rice.edu

238-4. Age Differences in Bosses' Performance Ratings

Research on performance appraisals, social processes, and stereotyping indicate age may impact decisions in the workplace. This study used multirater feedback data to examine the relationship between age and bosses' rat-

ings. Significant differences in bosses' ratings of ability were found on 2 dimensions measured. Implications, limitations, and future research follow.

240. Poster Session: Saturday, 3:30–4:20

Lone Star A-B (2nd floor-CC)

Justice, Conflict, Deviance

240-1. Job Relatedness and Selection Information Explanations on Perceptions of Fairness

This study investigated the effects of explanations using the procedural justice rules of selection information and job relatedness on fairness perceptions. Results indicate that for both the cognitive ability test and the personality assessment, providing an explanation that used the procedural justice rule of selection information increased fairness perceptions.

Brad Schlessman, Wright State University
David M. LaHuis, Wright State University

Submitted by Brad Schlessman,
bradschlessman@yahoo.com

240-2. An Identity Level–Emotional Intelligence Model of Procedural Justice

The present study developed a model of procedural justice that incorporated identity level, past injustice, and emotional intelligence in the prediction of organizational outcomes, including perceived organizational support. Our findings suggest that a consideration of past grievances and training of emotional regulation strategies can help organizations mitigate justice violations.

 Samantha Le Chau, University of Akron
 Brian G. Whitaker, University of Akron
 Christina M. Hanneman, University of Akron
 Kristine N. Graham, University of Akron

Submitted by Jason Dahling, jjd12@uakron.edu

240-3. How Generational Conflict and Self-Regulation Effect Job Tension

The current study examines the interactive effects of generational conflict and self-regulation on job tension. Results indicate that individuals with low self-regulation reported high job tension at high levels of generational conflict. However, individuals with high self-regulation perceived less job tension as generational conflict increased.

James Meurs, Florida State University
 James K. Summers, Florida State University

Submitted by James Meurs, jam04t@fsu.edu

240-4. Perceived Organizational Support: Overcoming Deviant Work Group Influence

This study examines whether perceived organizational support (POS) lessens the effects of deviant work group influence on individual performance of deviant behaviors. Results from 2 organizations suggest that the effect of average work group deviance (tardiness/production deviance) on individual deviance is weakened or eliminated when employees have high POS.

Paul Eder, University of Delaware

Submitted by Paul Eder, peder@udel.edu

240-5. Exploring Targets' Perceived Experiences of Workplace Incivility

The study explored perceived experiences of workplace incivility from the target's perspective. 217 participants working at least part time took part. Participants were either MBA students or human resource professionals. Regression analysis indicated that self-monitoring, negative affectivity, and climate accounted for a significant amount of variance in perceived workplace incivility.

Christine L. Ehrbar, Meyer Tool, Inc.
 Morell E. Mullins, Xavier University

Submitted by Morell E. Mullins, mullins@xavier.edu

240-6. Meta-Analysis of Interpersonal Deviance, Organizational Deviance, and Their Common Correlates

Relationships between interpersonal deviance (ID), organizational deviance (OD), and their common correlates were meta-analyzed. ID and OD were highly correlated but had differential relationships with key Big 5 variables and organizational citizenship behaviors. Whether the Bennett and Robinson (2000) instrument was used to measure deviance moderated some relationships.

Christopher M. Berry, University of Minnesota
 Deniz S. Ones, University of Minnesota
 Paul R. Sackett, University of Minnesota

Submitted by Christopher M. Berry, berry053@umn.edu

240-7. Is Fairness Truly in the Eye of the Beholder?

Justice researchers generally agree that fairness is in the eye of the beholder, yet no one to our knowledge has empirically tested this supposition (i.e., verified the construct is equivalent across samples). Results showed that group means were different and a multigroup analysis revealed different factor structures across 4 samples.

Zinta S. Byrne, Colorado State University
 Rachel M. Johnson, Colorado State University
 Dianne Nilsen, Personnel Decisions International

Submitted by Zinta S. Byrne, zinta.byrne@colostate.edu

240-8. Attributional Style as a Mediator Between Personality and Performance

This study tests a causal model of counterproductive behavior by Martinko et al. (2002), which proposes individuals' attributions act as mediators between personality and CWB. The model is also examined with regard to OCB. Results revealed that attributional style did not act as mediator between personality and CWB or OCB.

Becca A. Baker, North Carolina State University

Submitted by Becca A. Baker, beccabaker2@hotmail.com

240-9. Interactional Justice and Discipline Delivery: The Importance of Explanations

This study investigates how different types of explanations provided by a manager for a disciplinary action affect the employee's reported reactions and behaviors. Also investigated are the ways in which individual characteristics such as self-esteem, attitudes toward authority, and fear of negative evaluation interact with the different types of explanations.

Atira Charles, Arizona State University
 Leanne E. Atwater, Arizona State University-West
 Alan Goldman, Arizona State University-West

Submitted by Atira Charles, atira.brown@asu.edu

240-10. Peer Reporting of Counterproductive Work Behavior: A Policy Capturing Study

The present study used a policy capturing design to examine how individuals come to a decision about reporting counterproductive behavior that they witness in coworkers. Results suggest that situational variables play a strong role in influencing a decision to report and that these variables are weighted differentially across individuals.

Justin Arneson, University of Minnesota
 Paul R. Sackett, University of Minnesota
 Robert Richardson, University of Minnesota

Submitted by Justin Arneson, arne0063@umn.edu

240-11. Deception in Organizations: The Effect of Motives and Power Distance

We examined the impact of motives and power distance on the nature of deceptive communication. In self-oriented situations, people are generally more deceptive. However, in other-oriented situations, the nature of communication is moderated by the power distance between the message sender and the target. Theoretical and practical implications are discussed.

Matthew T. Allen, University of Oklahoma
 Vykinta Kligyte, University of Oklahoma
 Ethan P. Waples, University of Oklahoma

Submitted by Matthew T. Allen, mattallen@ou.edu

240-12. Role of Dispositional Uncertainty in Employees' Responses to Procedural Justice

Using uncertainty management theory, we tested whether procedural justice is a better predictor of employees' attitudes and psychological distress when they are dispositionally higher in uncertainty. Results indicate that procedural justice was more strongly associated with job satisfaction, organizational commitment, and depression when employees were dispositionally higher in uncertainty.

Chris A. Henle, University of North Carolina-Charlotte
 Bennett J. Tepper, Georgia State University
 Robert A. Giacalone, Temple University

Submitted by Chris A. Henle, cahenle@email.uncc.edu

240-13. Organizational Justice and Employee Health: A Meta-Analytic Integration

We conducted a meta-analysis to examine the effects of fairness perceptions (i.e. justice and psychological contract) on health. Differences between fairness dimensions and health were examined. Results suggest justice and contract fulfillment were related to health but not redundant. The fairness perception-health relationship differed across dimensions of health.

240-15. Facet-Level Interaction of Conscientiousness and Agreeableness on Counterproductive Work Withdrawal

The Big 5 factors of Conscientiousness and Agreeableness predicted counterproductive work withdrawal among childcare workers in 17 different centers. Unlike research on performance criteria, the C x A interaction did not enhance this prediction. However, the interaction of their responsibility and tolerance facets provided significant increments in predictive validity.

240-16. Multilevel Effects of Occupational Stress on Soldiers' Counterproductive Work Behavior

Counterproductive work behaviors (CWBs) are intentional behaviors by employees that are contrary to the goals of the organization. Occupational stress may weaken and eventually override the cognitive controls that prevent CWB. Our results demonstrate that different stressors may be stronger predictors of within-person change and between-person differences in CWB.

240-17. Credibility Assessment in Work Situations Using Theoretical Verbal Analysis Criteria

The purpose of this study was to provide validation evidence for a deception detection method: theoretical verbal analysis (TVA). Results demonstrate systems' ability to discriminate between truthful and deceptive verbal statements in a variety of work contexts. This is particularly true for criteria related to self-presentation and linguistics.

240-22. Fairness Perceptions: Is What's Considered Just Equivalent for All?

The effectiveness of organizational interventions is typically evaluated using changes in mean levels. However, Golembiewski, Billingsley, and Yeager (1976) proposed the existence of 3 types of change: alpha, beta, and gamma. This paper applies the tripartite conceptualization of change to evaluations of fairness in the context of workplace reorganization.

High Fidelity Assessments: Benefits, Challenges, and Innovations

Work-sample assessments provide among the best and highest validity approaches to employee selection and developmental assessment. However, as jobs increase in complexity and become more integrated with technology, practitioners are challenged to create realistic work samples appropriate for high-volume and/or price-conscious assessment. This forum presents innovative solutions to these challenges.

registration desk for only \$49.99!

What if you could measure leadership competencies and leadership character — in a single instrument?

Wilson Learning has developed a single instrument to measure both the **FORM** (the competencies) and the **ESSENCE** (character and values) of leadership.

Leadership **FORM** is demonstrated in key roles – Visionary, Tactician, Facilitator, and Contributor. Leadership **ESSENCE** is demonstrated in Personal, Social, and Organizational character. Our instruments measure *both* through observable behaviors.

Our Integrated Leadership Model can be easily configured to fit levels from team leader through senior executive. It can be used in various assessments, including multi-rater surveys with our proven Leader Navigator platform.

WORKFORCE RESEARCH AND ANALYSIS

AIR's Workforce Research and Analysis Program (WRA) works to enhance the performance of individuals and of organizations. AIR has focused on this critical need for almost 60 years since our founder, John Flanagan, began developing combat pilot selection procedures to identify candidates who were best suited for these high-stress jobs.

Today, AIR's Workforce Research and Analysis Program is helping organizations to select and retain the qualified staff that they need and to enhance performance, productivity, and capacity to change through identifying, providing, and evaluating employer training efforts, and improving organizational procedures and systems to ensure a more effective, safe, and productive workforce. Our work emphasizes fair and equal employment practices. WRA also helps organizations develop products that are easier to use by merging our expertise in psychology, design, and engineering.

Workforce Research and Analysis Program highlights include:

- Created and developed the flight-check system and assessment model used by many airlines today to reduce pilot error.
- Helped ensure that the electrical industry has thousands of highly trained and highly skilled workers by developing assessments in this field.
- Analyzed driver behaviors and other factors responsible for highway accidents. The results of AIR's research were used to improve vehicle and highway design and to develop new guidelines for driver training.
- Designed and analyzed the National Assessment of Adult Literacy examining the literacy skills of America's adults in workplace, community, and family settings.
- Assisted the Federal Election Commission in providing guidance on obtaining user-friendly equipment that has easy-to-follow procedures for voters and those certifying election results.

WANTED

Intelligent I/O consultants that are:

- Experts in Employee and 360 survey design and implementation
- Driven to grow business activity
- Established with an existing client base
- Dedicated to reducing technology cost and concerns

If you fit this description we need to talk!
Our mission is to help you grow your practice.

SURVEY TECHNOLOGY CENTER

At the Survey Technology Center we can support your survey with:

- Multi million dollar survey software running in an online ASP environment
- Professional qualified staff
- High-speed robust secure equipment/hardware
- Data collection via Web, paper and/or IVR
- Tailored website
- Branding

**Your survey content,
your customers, our technology.**

We help survey over 2 million people, in over 30 countries and in 36 languages.

Benefits to you as a consultant:

- IT Support for data collection and report generation
- Expand your offerings
- Ability to private label and brand the software to your organization

Contact us at SIOP.

GRADUATE PROGRAMS AT ELMHURST

Industrial/Organizational Psychology

**Ranked among the Top 5 in the nation
by a study published in TIP.**

- **This groundbreaking master's program** links the science of psychology with the challenges of today's workplace. You'll design and implement organizational interventions—applying cutting-edge psychological research to the most critical problems of industries and the people who work in them.
- **In convenient evening classes**, you can earn your degree in just two years of part-time study. You'll complete real-world projects, gain crucial insights into how teams actually work, and develop your critical thinking and communication skills.
- **You can earn your MBA, too!** In just one year of additional part-time study, you'll gain not only advanced business knowledge but also intensely practical business experience. The combination will give you an invaluable competitive edge.

**Elmhurst offers
master's programs in
nine intriguing fields.**

- The Elmhurst MBA
- Industrial/Organizational Psychology
- Supply Chain Management
- Professional Accountancy
- Computer Network Systems
- Nursing
- Teacher Leadership
- Early Childhood Special Education
- English Studies

Coffee Break
Sunday, 7:30-8:00
Multiple Locations

250. Special Event: Sunday, 8:00–9:50
Houston C (3rd floor-CC) ★

Crossing Disciplinary Boundaries: Insights for I-O Psychology Practice, Research, Teaching

Three distinguished scholars from outside the field of I-O psychology (engineering, educational psychology, and law) will discuss how their disciplines approach various research topics (safety, testing, work–life) studied by I-O psychologists. There will be an emphasis on how divergent fields can benefit from cross-disciplinary methods, theories, and perspectives.

Wendy R. Boswell, Texas A&M University, *Chair*
 Sam Mannan, Texas A&M University, *Measuring and Improving Safety Climate in the Chemical Process Industry*

Ric Luecht, UNC-Greensboro, *Engineering the Test: Principled Item Design to Automated Test Assembly*

Joan C. Williams, UC Hastings College of Law, *The Material Wall: Workplace Bias Triggered by Family Care-Giving Responsibilities*

Richard J. Klimoski, George Mason University, *Discussant*

251. Education Forum: Sunday, 8:00–9:50
Austin 1 (2nd floor-H)

Teaching Practice and Practicing Science: I-O Psychology Beyond the Classroom

Growing interest in applied aspects of I-O psychology has made teaching applied skills to graduate students vital. This diverse panel will discuss a range of existing programs and techniques utilized to teach master's and doctoral students applied skills, the competencies and skills taught, and what organizations seek in graduating students.

Eyal Grauer, ePredix, Inc./ Bowling Green State University, *Presenter*

Submitted by Eyal Grauer, eyal@bgnet.bgsu.edu

252. Practice Forum: Sunday, 8:00–9:50
Austin 3 (2nd floor-H)

Globalization Impact on I-O Psychologists

Presenters share their perspective and advice regarding I-O psychology practices in an increasing global environment. These include specific areas in terms of knowledge and skills that need to be developed in practitioners, the adaptation of I-O practices, and the avenues to expand I-O's role in helping businesses expand globally.

Michelle L. Biro, Whirlpool Corporation, *Chair*
 Michael M. Harris, University of Missouri-St. Louis, *Going Global: Some Critical Issues for I-O Psychologists in the 21st Century*

253. Symposium: Sunday, 8:00–9:50
Majestic 1 (37th floor-H)

Linkage Research in Customer Service: Connecting Levels, Stakeholders, and Disciplines

Although we are in a service economy, we still have disjointed knowledge about how to improve customer service. The studies in this symposium integrates I-O psychology, management and marketing research, link information from multiple sources, and present a comprehensive examination of how organizational internal functioning transforms into external customer outcomes.

Hui Liao, Rutgers University, *Chair*

Hui Liao, Rutgers University, Aichia Chuang, National Taiwan University, *Serving Customers and Building Customer Relationships: A Multilevel Multisource Examination of the Role of Leadership*

John P. Hausknecht, Cornell University, Charlie O.

Trevor, University of Wisconsin-Madison, Michael J.

Special Sunday morning programming has been selected on the topic of Crossing Disciplinary Boundaries. These eight themed sessions are marked with the following symbol: ★

Howard, Harrah's Entertainment, Ginger Whelan, Harrah's Entertainment, Inc., *Unit-Level Antecedents of Customers' Perceptions of Service Quality*

Benjamin Schneider, Valtera, William H. Macey, Valtera, Scott A. Young, Valtera, Wayne C. Lee, Valtera, *Service Climate and Service Engagement as Correlates of the American Customer Satisfaction Index*

Joerg Dietz, University of Western Ontario, S. Douglas Pugh, University of North Carolina-Charlotte, Jack W. Wiley, Gantz Wiley Research, Scott M. Brooks, Gantz Wiley Research, *Managers and Their Employees as Forecasters of Customer Satisfaction: Who Does Better?*

Karen Holcombe Ehrhart, San Diego State University, Lawrence A. Witt, University of New Orleans, Benjamin Schneider, Valtera, *Managing Networked Organizations: The Role of Internal Service*

Submitted by Hui Liao, huiliao@smlr.rutgers.edu

254. Symposium: Sunday, 8:00–9:50 Majestic 4-5 (37th floor-H)

Recovery From Job Stress During Off-Job Time

This symposium includes 4 empirical papers on recovery from job stress. The papers demonstrate that recovery episodes and particular recovery experiences such as positive social interactions, uplifts, and psychological detachment from work are beneficial for recovery as expressed in indicators of well-being, work behavior, and reduced crossover of strain between spouses.

Sabine Sonnentag, University of Konstanz–Germany, *Chair*

Charlotte Fritz, Bowling Green State University, *Co-Chair*
Adam B. Butler, University of Northern Iowa, Joseph G. Grzywacz, Wake Forest School of Medicine, Brenda L. Bass, University of Northern Iowa, *Quality of Daily Family Interactions and Work–Family Facilitation*

Fred A. Mael, American Institutes for Research, *Discussant*

Submitted by Michael Johnson, johnson@bus.msu.edu

256. Panel Discussion: Sunday, 8:00–9:50 Majestic 3 (37th floor-H)

The Future of Personnel Selection: Evolution of Science and Practice

This session explores 3 forces driving changes in organizations—globalization, demographic trends, and technology—and considers their current and potential future impact on personnel selection. Five experts representing various perspectives will discuss how these trends influence assessment programs, challenges they create, and the impact of new developments on assessment practices.

Jay Janovics, ePredix, *Chair*
Holly S. Payne, PreVisor, *Co-Chair*

Craig J. Russell, University of Oklahoma, *Panelist*
 Rex C. Backes, Bank of America, *Panelist*
 R. Jason Weiss, DDI, *Panelist*
 Melanie Blunt, University of Missouri-St. Louis, *Panelist*
 Ken Lahti, ePredix, *Panelist*

Submitted by Jay Janovics, jay.janovics@epredix.com

257. Practice Forum: Sunday, 8:30–9:50 Austin 2 (2nd floor-H)

Empirical Investigations of Unproctored Personality Measures Used for Employee Selection

Four empirical studies, most using actual applicant data, examined issues related to administering personality measures to candidates in an unproctored, unsupervised setting (e.g., allowing candidates to complete measures off-site or at home). Issues related to validity, applicant faking, and level of supervision are discussed.

Steven T. Hunt, Unicru, Inc., *Chair*
 Scott A. Davies, Hogan Assessments Systems, *Factor & Parameter Invariance of a Five Factor Personality Test Across Proctored/Unproctored Computerized Administration*
 Patrick L. Wadlington, Hogan Assessment Systems, Anne Thissen-Roe, Unicru, Inc., *Inadvertent Honesty: Occurrence and Meaning of Applicant Faking in Unproctored Personality Tests*

Leader–Member Exchange

Cecily D. Cooper, University of Miami, *Facilitator*

262-1. Leader–Member Exchange: Analyzing Levels, Gender Match, LMX Tenure, and Support

We examined the antecedents and impact of leader–member exchange (LMX) in the Malaysian context. Gender match influenced LMX-Affect, which in turn led to orga-

nizational support (POS). Supervisory support affected both dimensions—contribution and affect—of LMX and POS. LMX tenure did not influence LMX-Affect, and LMX-contribution did not influence POS.

Kanika T. Bhal, Indian Institute of Technology Delhi
Mahfooz A. Ansari, University Science Malaysia
Rehana Aafaqi, University Science Malaysia

Submitted by Mahfooz A. Ansari, mahfooz@usm.my

262-2. Gender Dyad Composition Moderated LMX and Subordinates' Organizational Attitudes Relationship

Participants were members of 120 leader-subordinate dyads. A significant interaction effect was found for mixed gender dyads on the relationship between subordinates' perceptions of LMX and their satisfaction. Female subordinates who reported moderate LMX were significantly less satisfied with their male leaders than their male counterparts were.

Roya Ayman, Illinois Institute of Technology
Melissa Rinchuso, Illinois Institute of Technology
Karen Korabik, University of Guelph

Submitted by Roya Ayman, ayman@iit.edu

262-3. Putting the "Exchange" Back in LMX: Valued Outcomes and Resources

LMX research has highlighted benefits that accrue to members in a high-quality relationship with their leader. Less is known about the outcomes for leaders. This paper presents a social exchange based argument to understand outcomes and resources available to a leader based on the reciprocal nature of LMX.

Anjali Chaudhry, University of Illinois at Chicago

Submitted by Anjali Chaudhry, achaud2@uic.edu

262-4. Leader-Member Exchange and Citizenship Behaviors: A Meta-Analysis

This article provides a meta-analytic review of the relationship between leader-member exchanges (LMX) and citizenship behaviors. Results based on 50 independent samples (total $N = 9,324$) indicated a moderately strong, positive relationship between LMX and citizenship behaviors ($p = .37$). LMX predicted individual-targeted behaviors more strongly than organizational-targeted behaviors ($p = .38$ vs. $p = .31$), and the difference was statistically significant.

Jennifer D. Nahrgang, Michigan State University
Remus Ilies, Michigan State University
Frederick P. Morgeson, Michigan State University

Submitted by Jennifer D. Nahrgang, nahrgang@msu.edu

263. Poster Session: Sunday, 9:00–9:50 Lone Star A-B (2nd floor-CC)

Training, Power, Ethics

263-1. Learner Control in a Web-Based Course: Pace Yourself!

In a Web-based course, learners were randomly assigned to receive more or less learner control over the pace of the course and context of examples provided. Greater control over pacing resulted in better learning outcomes, especially for low procrastinators. Implications for the design of e-learning programs are discussed.

Barbara A. Fritzsche, University of Central Florida
Karen E. Mottarella, University of Central Florida
Renee Eileen DeRouin, University of Central Florida
Eduardo Salas, University of Central Florida

Submitted by Barbara A. Fritzsche,
bfritzsc@mail.ucf.edu

263-2. Political Skill in Organizations

Political skill is a construct that was introduced more than 2 decades ago as a necessary competency enabling effectiveness in organizations. The present paper defines and characterizes political skill and then proposes a conceptualization of how political skill operates to exercise effects on both others and the self in organizations.

Gerald R. Ferris, Florida State University
Robyn L. Brouer, Florida State University
Pamela L. Perrewe, Florida State University
Wayne A. Hochwarter, Florida State University
Ceasar Douglas, Florida State University
Darren C. Treadway, University of Mississippi

Submitted by Robyn L. Brouer, rlb03f@fsu.edu

263-3. Effectiveness of Web-Based Instruction Relative to Classroom Instruction: A Meta-Analysis

Meta-analytic techniques were used to examine the effectiveness of Web-based instruction (WBI) relative to classroom instruction (CI) and to examine moderators of training effectiveness. The 2 delivery media are equally

effective for teaching declarative knowledge when controlling for the instructional methods. Guidance on designing more effective Web-based courses is provided.

Traci Sitzmann, Advanced Distributed Learning Co-Laboratory

David Stewart, University of Tulsa

Kurt Kraiger, Colorado State University

Robert A. Wisher, Department of Defense

Submitted by Traci Sitzmann, sitzmant@adlnet.org

263-4. Measuring Work Ethic: An Application of Polytomous Item Response Theory

We apply polytomous item response theory to develop a short form of the Multidimensional Work Ethic Profile (MWEP; Miller, Woehr, & Hudspeth, 2002). The original MWEP is reduced by approximately 50% while psychometric properties are maintained. Emphasis is placed on providing an illustration of the IRT-based scale development process.

John P. Meriac, University of Tennessee

Taylor Poling, University of Tennessee

David J. Woehr, University of Tennessee

Submitted by John P. Meriac, johnmeriac@yahoo.com

263-5. Business Leaders' Perception of the Value of Empirical/Statistical Evaluation

Empirical evaluation is a bedrock of I-O psychology, yet few business leaders are familiar with I-O or quantitative techniques. We found a mismatch between the emphasis given empirical evaluation in I-O graduate programs and the value placed on it by business leaders. Implications for I-O training and jobs are discussed.

Benjamin M. Walsh, Center for Social and Behavioral Research

Michael B. Gasser, University of Northern Iowa

Adam B. Butler, University of Northern Iowa

Submitted by Benjamin M. Walsh, bwalsh@uni.edu

263-6. Relationships Between Need for Achievement, Impression Management, and Work Strain

The purpose of this paper was to examine need for achievement as a dispositional antecedent to impression management behaviors and how impression management behaviors relate to work strain. The findings showed that need for achievement is an antecedent to 4 impression management behaviors, and intimidation did predict work strain.

Robyn L. Brouer, Florida State University

Kenneth J. Harris, Indiana University Southeast

Submitted by Robyn L. Brouer, rlb03f@fsu.edu

263-7. Effect of Language Ability on Expatriate Adjustment: A Meta-Analysis

A meta-analysis was conducted to examine the effect of language ability on expatriate adjustment and to estimate population parameters. As hypothesized, the results showed positive effects of language ability on expatriate adjustment. The significance of the moderator of work versus nonwork criteria underscores the importance of measurement in expatriation research.

Laura Galarza, University of Puerto Rico

Submitted by Laura Galarza, lagalarza@hotmail.com

263-8. Politics, Stress, and Satisfaction: Personal and Situational Buffers

We examined how personal and situational characteristics moderate the effect of politics perceptions on job-related stress, which in turn mediate these interaction effects on satisfaction. Results indicated that (a) psychological hardiness and perceived organizational support moderated the politics-stress relationship, and (b) stress mediated the effects of these interactions on satisfaction.

Christopher C. Rosen, University of Akron

Chu-Hsiang Chang, Roosevelt University

Russell E. Johnson, University of Akron

Submitted by Christopher C. Rosen,
ccr3uakron@hotmail.com

263-9. Performance Feedback: A Catalyst of High Quality Employee Self Development

The present paper investigates the effect of supervisory performance feedback on employee decisions and behaviors with respect to engagement in high-quality self-development. A conceptual model is presented that explicates the self-regulatory mechanisms underlying the relationship between performance feedback and quality of self-development. Implications are discussed.

Karin A. Orvis, George Mason University

Pamela M. Wells, San Jose State University

Megumi Hosoda, San Jose State University

Submitted by Karin A. Orvis, Korvis1@gmu.edu

263-10. Ethical Leadership Through Ethical Scandal, Intervention and Post Intervention Periods

This study examines one county's emergence from an ethical scandal to identify leadership lessons that other companies can use to do the same. Preliminary analysis of newspaper articles indicates that the further the agency moved from the ethics scandal, the more ethical leadership characteristics were reported.

Wendy O'Connell, Claremont Graduate University
Michelle C. Bligh, Claremont Graduate University
Kathie L. Pelletier, County of San Bernardino

Submitted by Wendy O'Connell,
Wendy.OConnell@cgu.edu

263-11. Do Strategy and High-Performance Work Practices Predict Training Culture?

Few researchers have investigated organizational culture in relation to training. Using 4 years of data ($n = 5209$), the results show that strategy and high-performance work practices predict training culture, operationalized as the level and variance, or persistence of training offered by an organization over a period of time.

Sara L. Mann, University of Toronto
Anil Verma, University of Toronto

Submitted by Sara L. Mann,
smann@rotman.utoronto.ca

263-12. Assessing Training Needs: Do Raters' Work Experience and Capability Matter?

A frequently neglected area of personnel training research is training needs assessment. We specifically examined the impact of individuals' work experience, self-efficacy, and levels of skill proficiency on their subsequent ratings of training needs. Results indicate that self-efficacy and skill proficiency are influential, with proficiency displaying a more potent impact.

Erich C. Dierdorff, DePaul University
Eric A. Surface, Surface, Ward & Associates
Jack Donnelly, United States Special Operations Command

Submitted by Erich C. Dierdorff,
ec_dierdorff@msn.com

263-13. Reputation as Moderator of Political Behavior-Work Outcomes Relationships

The 2-study research hypothesized, and found support, for reputation as a moderator of the relationships between political behavior and the work outcomes of uncertainty, exhaustion, and job performance. For individuals with favorable reputations, the demonstration of political behavior was associated with decreased uncertainty and emotional exhaustion, and increased job performance.

Wayne A. Hochwarter, Florida State University
Breda Arnell, Florida State University
Gerald R. Ferris, Florida State University
Robert Zinko, Florida State University
Kmat Kja, Jacksonville University

Submitted by Pamela L. Perrewe, pperrew@cob.fsu.edu

263-14. Examination of Big Five Predictive Validity Across Training Performance Criteria

This study examined relationships among the Big 5, cognitive ability, and training performance in a sample of 370 Marines attending recruiter training. Big 5 personality dimensions predicted performance on simulation-based criteria but not paper and pencil-based criteria. Several personality dimensions provided incremental validity over cognitive ability in predicting training performance.

Michelle A. Dean, San Diego State University
Jeffrey M. Conte, San Diego State University
Tom R. Blankenhorn, San Diego State University

Submitted by Michelle A. Dean,
michelle.dean@sdsu.edu

263-15. Assessing Change in Perceived Organizational Support Due to Training

This study examined how perceptions of organizational support for training were influenced by job-related foreign language training using a pretest-posttest design. Trainees included 194 participants in a large military organization. Results were indicative of gamma change, supporting the hypothesis that the training influenced perceptions of organizational support among the trainees.

Christy Kroustalis, North Carolina State University/
Surface, Ward & Associates
Adam W. Meade, North Carolina State University
Eric A. Surface, Surface, Ward & Associates

Submitted by Torrey Rieser Mullen, trmullen@nc.rr.com

263-16. Coaching Managers and Junior Executives: Goals, Performance, and Adherence

A coaching program for lower-level managers ($n = 30$) and junior executives ($n = 29$) involved in military recruiting was evaluated. Outcomes included goal achievement, adherence, competencies, and subordinate unit performance. Coached but inexperienced participants outperformed noncoached but experienced previous managers/junior executives. Performance-related benefits were most evident at the level of managers.

Stephen V. Bowles, U.S. Army Recruiting Command
James Picano, Department of Veterans Affairs Northern California

Gabriel M. De La Rosa, Bowling Green State University
Christopher J. Cunningham, Bowling Green State University

Submitted by Christopher J. Cunningham,
ccunnin@bgnet.bgsu.edu

263-17. Examining Knowledge Structure Development and Predictors of Performance

This longitudinal study investigated the validity of knowledge structure development as a measure of complex cognitive learning over 15 weeks, as well as examining declarative knowledge, metacognition, motivation, and cognitive ability. Similarity of expert and trainee knowledge structures predicted performance over and above cognitive ability, as did motivation and metacognition.

263-18. Self-Efficacy, Collaborative Learning, and Complex Skill Acquisition: An Attribute-Treatment Interaction

This laboratory study showed that collaborative training with a more experienced partner versus individual training enhanced the acquisition of a complex skill for trainees with low pretraining self-efficacy but not for trainees with high pretraining self-efficacy. Collaborative training is discussed in relation to research on behavioral modeling and behavioral plasticity.

263-19. Sexual Harassment Training: Man Versus Machine

This study investigated whether computer-based sexual harassment training is effective in terms of reactions and learning outcomes compared to traditional instructor-led training. The results suggested that both types of training increased learning among the university employee participants. Reactions to both types of training were positive.

Submitted by Melissa K Preusser, mpreuss@siue.edu

263-20. The Comparative Effectiveness of Human Versus Intelligent Agent Training Partners

We investigated the effectiveness of humans versus intelligent agents as training partners during complex skill acquisition. Our results indicate participants had more favorable reactions to human partners, but we observed no learning or self-efficacy differences. Thus, the use of intelligent agents can address the administrative/scheduling challenges of team training.

263-21. Modeling the Links Between Need for Cognition and Skill Acquisition

This laboratory study tested a causal model of how need for cognition (NFC) is linked to the acquisition of a complex skill. Results showed that NFC was associated with, but distinguishable from, general cognitive ability and linked to skill acquisition through the mediating roles of learning orientation and self-efficacy.

263-22. Effects of Training Utility Perceptions and Organizational Support on Transfer

This longitudinal study examined the interaction between trainee characteristics and trainees' perceptions of organizational support. We examined and found that perceptions of utility mediated the relation between perceived organizational support and transfer to the workplace. We also looked at how individual differences affect perceptions of utility and organizational support.

263-23. Learning From Error: The Influence of Error Incident Characteristics

This study investigated whether severity of consequences and personal control were related to learning after error occurrence. Results show that learning from error is triggered when severity of consequences is high and personal control over the error cause is low. We conclude with implications for practitioners.

263-24. Effects of Pretraining Influences on Static and Dynamic Change Phases

We examined pretraining influences on the static and dynamic phases of readiness to change under nonoptimal training conditions. Results indicated differentials role of goal orientation, self-efficacy, motivation to learn, and social support in these models. Results provided preliminary evidence regarding increasing training effectiveness under adverse training conditions.

263-25. Knowledge Structures and Complex Skill Acquisition: A Replication and Extension

This laboratory study extends previous training research by demonstrating how knowledge structures predict complex skill acquisition beyond a test of declarative knowledge. Knowledge structures early in training also showed incremental validity beyond early levels of skill acquisition in the prediction of skill acquisition levels at the end of training.

263-26. Self-Presentation and Positive Affect as Buffers Against Abusive Supervision

This study tests the interactive effects of abusive supervision, self-presentation, and positive affect (PA) on strain and turnover intentions. We hypothesized that self-presentation would neutralize the adverse effects of abusive supervision for individuals with high PA but not for those with low levels of PA. Findings supported each hypothesis.

263-28. Quality Management Through Human Resources: A Case in Healthcare

This paper examined the relationship of quality management through human resources (HR) to organizational performance outcomes. Derived from Baldrige criteria, implementation of quality management through HR included the areas of leadership, knowledge management, strategic management, process management, general human resource functions, and customer and employee focus. Organizational performance outcomes included employee satisfaction, customer satisfaction, and clinical and financial outcomes.

Expanding our influence: How I-O Psychologists Can Improve Education

In this session, we present different perspectives on using I-O psychology to improve teaching and schools. Much research needs to be done on this subject, and we believe that I-O can play an integral role in it. As such, we discuss the advantages and challenges of this nontraditional area.

Adverse Impact

Tatana M. Olson, United States Navy, *Facilitator*

274-1. The Implications of Frequent Applicants on Adverse Impact Analyses

Technological advances have notably reduced the applicant's investment required to apply for a job. This study demonstrates the implications of allowing the same unqualified applicant into multiple pools for adverse impact analysis. Simulations indicated that frequent applicants can bias analyses of statistical disparity.

Ash Buonasera, University of Kansas
Daniel C. Kuang, American Institutes for Research
Eric M. Dunleavy, American Institutes for Research
Lorin M. Mueller, American Institutes for Research

Submitted by Ash Buonasera, abuonasera@air.org

274-4. Effects of Veterans' Preference on Adverse Impact and Job Performance

Using Monte Carlo simulations, we manipulated key selection system characteristics to test the effects of veterans' preference (VP) across a range of situations encountered in practice. Results suggest VP may reduce adverse impact against racial minorities but result in lower job performance and present an obstacle to female applicants.

Brian C. Holtz, University of Calgary
Robert E. Ployhart, University of South Carolina

Submitted by Brian C. Holtz, bholtz@ucalgary.ca

274-2. Broad Versus Narrow Traits: Advantages for Adverse Impact Against Women

We investigated the effect of using Big 5 versus narrow personality traits with respect to adverse impact on women in a selection context. Generally, there was less adverse impact when using Big 5 traits. Using broad traits for selection is discussed as a way to deal with male/female differences.

I-O Psychology Graduate Student Seminar

What?

- Collaborate with a **select team** of the country's **top I-O doctoral students** and **P&G's internal I-O PhD's**
- Collectively solve a **pressing business problem** facing **P&G's** Global Talent Supply group
- Learn about **P&G**, a leading consumer products company that has **utilized I-O psychologists for over 80 years**
- **Interview for a 4-6 month internship** to continue collaboration with **P&G's** internal I-O PhD's

Who?

- I-O PhD graduate students who have:
 - Completed at least 1 year of graduate school
 - Demonstrated ability in research design, execution and assessment
 - Proficiency with MS Office (especially PowerPoint and Word)
 - Relevant coursework or experience in employee selection, testing, and psychometrics (preferable)

When? Where?

- September 26-29, 2006
- Cincinnati, OH (all expenses paid!)

How?

- **APPLY BY AUGUST 4, 2006!**
 - To Apply: Go to www.usjobs.pg.com. Apply to job number 485, titled "HR-I/O Psychologist Graduate Student Seminar"

Touching lives, improving life, **P&G**

ERGOMETRIKA

An Electronic Journal for the Study of the World of Work

Ergometrika is a peer-reviewed multidisciplinary journal devoted to the study of modern-day work— an innovative forum which publishes articles on research, theory, and exemplary applications (e.g., job analysis, task analysis, occupational analysis, worker-fit, training needs determination, and *workplace psychometrics generally*). We also solicit manuscripts on reliability, content validity, item or questionnaire performance, and other foundational measurement topics often avoided by more traditional journals in Industrial and Organizational Psychology, Management, Business, Labour and Work Sociology areas. We hope to spur new research in these measurement areas, and thus improve the quality of instruments and/or methods applied by relevant practitioners.

The Pinocchio-Test: How honest are your prospective employees?

We will be available at the
SIOP Conference 2006.

Contact us in advance for a
personal meeting or a research or
business partnership
at info@HR-Diagnostics.com

Honest and loyal employees are vital to your organizational success. With our psychological integrity scale PIA, you can identify honest employees and decrease bullying, theft, and absenteeism. The PIA is a unique personality-based inventory that it is well accepted by the applicants and it is legal in its application in most countries world-wide.

HR Diagnostics AG integrates web-based personnel selection methods with a state-of-the-art applicant tracking system. We take pride in having the confidence of numerous international customers in various industries. Our customers trust in our expertise in both personality testing and the assessment of knowledge, skills, abilities, and other qualifications (KSAO). We not only provide support in employment decisions but also in assessing training needs or in providing the decisional base for promotions of actual job candidates. Our scientific director, Prof. Heinz Schuler, is renowned for his outstanding research and publications in personnel psychology.

His supervision of all our products guarantees **highest scientific standards and top quality**. As we are expanding our business internationally, we are looking for partners with both marketing and sales skills as well as with test authors and scientific collaborators focussing on web-based testing and KSAO assessment. We can offer **comprehensive personnel selection solutions** for your organization – you can select employees from different locales in different languages such as English, German, Chinese, French, Italian or Polish.

One of our most crucial organizational values states that our products are of top quality. This is true for our

- Applicant Tracking Management System
- Personnel selection tools for a broad range of competences such as **intelligence, reasoning, achievement motivation, personality-based integrity, customer orientation, the Big Five personality dimensions, technical and mechanical understanding, situational judgment tests and many more.**

- Interculturally and cross-nationally applicable skills and ability assessment tests and inventories
- Job analysis
- Employee surveys
- Customized performance appraisal systems

How can you profit from our services?

- use a decentral internet-based secured application management system
- select employees with task- and job-relevant tests and inventories
- ask us for regional legal and cultural specifics to support your recruitment of employees at new sites abroad like Germany, China, etc.
- collaborate with us in the construction, validation, norming, and affirmative action evaluation of multi-lingual tests

Find out more about our services at:
www.HR-Diagnostics.com

Putting Science To Work

Talent Management is a global priority and companies are increasingly investing in human capital measurement systems to improve overall company performance. Using the principles of science, I/O Psychologists deliver bottom line value to the business. Connecting human capital measurement with business value requires specialized technology and a software partner with a track record of success.

For the past eight years, Data Solutions (DSI) has successfully delivered technology solutions to support human capital measurement and the I/O practitioner. DSI delivers programs tailored to your business, using configurable technology, that support sophisticated I/O measurement processes. Our capabilities include:

- Process Design & Technology Configuration
- Program Administration & Self Service
- Sophisticated Real-Time Scoring & Reporting
- Data & Systems Integration

DSI clients include the world's most prestigious consulting organizations and leading multi-national corporations. We have enabled our clients to cost effectively measure, improve, and evaluate human performance by providing technology to implement multi-rater, employee engagement, selection, talent management, and custom evaluations.

To learn how DSI's proven technology platform can be configured to support HR measurement, effective decision making, and maximize return on human capital in your organization visit our website or contact DSI at 952-943-8137.

Special Events

- 1 Shaping Our Destiny
- 11 The Making of a Coach
- 15 SIOP Organizational Frontiers Series: Situational Judgment Tests—Theory, Measurement, and Application
- 16 Distinguished Scientific Contributions Award: Deonance: Toward a New Organizational Justice Paradigm
- 27 Distinguished Professional Contributions Award: Applied Psychology in the Executive Suite: Elegant Theory and Ugly Practice
- 38 Plans for a New SIOP-Sponsored Journal
- 45 Making Connections: Strategies for Communicating I-O to Non-I-O Audiences
- 48 Distinguished Early Career Contributions Award: Justice in Teams: Lessons Learned and Future Directions
- 62 TIP-Topics Roundtable Discussion: Facilitating Collaboration Among Graduate Students
- 90 Distinguished Professional Contributions Award: 30 Years of Biodata: Lessons Learned
- 114 Top Posters—Evening Reception
- 142 Getting More Respect: Informing Multiple Constituents About I-O Scientific Contributions
- 151 Ethics Reconsidered: Reflections From Inside and Outside I-O Psychology
- 156 Distinguished Scientific Contributions Award: The Subjective Nature of Objective Measures of Performance
- 167 Distinguished Teaching Contributions Award: I-O Teachers: Druids in the Desert, or the Invisible Man?
- 189 M. Scott Myers Award for Applied Research in the Workplace: Project GLOBE: Original Goals, Current Critiques, and Future Directions
- 213 Executive Leadership: The Leading Edge and Beyond
- 250 Crossing Disciplinary Boundaries: Insights for I-O Psychology Practice, Research, Teaching

Statistical Techniques

- 69-2 Multilevel Homology Tests Are Easiest With Multilevel Structural Equation Modeling
- 69-3 Generalized Multilevel Structural Equation Modeling for Research in Organizations
- 69-7 Using the Chow Test for Regression Analysis of Compensation Discrimination
- 69-11 Alternate Cutoff Values and DFIT Tests of Measurement Invariance
- 69-21 Examining Faking on Personality Inventories Using Unfolding IRT Models
- 69-22 On the Use of Partial Covariances in Structural Equation Modeling
- 69-23 Evaluation of the SAMD-z Statistic for Detecting Outliers in Meta-Analysis
- 69-25 Applying Meta-Analysis to Adverse Impact Assessment: A Monte Carlo Simulation
- 76 Testing Causal Models in Nonexperimental Research
- 92 Applications of Conjoint Analysis in Industrial-Organizational Psychology
- 143 Testing Interaction Effects: Problems and Procedures
- 205 Using Statistical Techniques to Correct Rater Bias in Multi-Source Ratings

Strategic HR/Utility/Changing Role of HR

- 66 Investigating the Leadership Pipeline: Selection and Development Implications

Stress

- 9 On the Front Line at Home: Helping Military Recruiters Cope
- 30-2 Correlates of Three Stress Reactions: A Conceptual and Meta-Analytical Comparison
- 30-3 Social Stressors, Core Self-Evaluations, and Work Outcomes
- 30-5 The Role of Collective Identity in the Organizational Stress Process
- 30-6 Frustration in Graduate School: The Role of Goal Orientation
- 30-8 Conflict and Emotional Exhaustion: Another Look at the Burnout Progression
- 30-10 Interaction of Job-Limiting Pain and Perceived Support on Work Contributions
- 72 HR Best Practices in the Aftermath of Hurricane Katrina
- 254 Recovery From Job Stress During Off-Job Time

Student Affiliate Development and Issues

- 109 Graduate Student Seeking Applied Position: Strategies for Success
- 198 Career Panel: So You Want to Be a Consultant?
- 248 Early Careers in I-O Psychology: It Ain't Easy Being Green
- 265 Strategic and Interdisciplinary Use of Internship Opportunities for Organizational Effectiveness

Succession Planning

- 36 Continuing the Search for Talent Management
- 122 Talent Management: Will the High Potentials Please Stand Up?

Teaching I-O Psychology

- 35 Leaving the Psychology Tower: Nontraditional Programs in I-O Psychology
- 185 Making the Move From Psychology to B-Schools: Issues to Consider

- 201 Challenging the Scientist–Practitioner Model: Questions and Alternatives
- 247 Getting Your Students' Hands Dirty: Active Learning in I-O Courses
- 251 Teaching Practice and Practicing Science: I-O Psychology Beyond the Classroom
- 263-5 Business Leaders' Perception of the Value of Empirical/Statistical Evaluation

Technology and I-O (Internet, Video, Computer)

- 28-3 A Model of Employee Reactions to Electronic Performance Monitoring
- 30-7 Testing a Model Of Sense Of Virtual Community
- 30-12 Face-to-Face Versus Virtual Team-Member Selection Decisions
- 30-14 The Team Machine: A Decision Support Tool for Team Formation
- 30-17 An Exploratory Examination of the Determinants of Knowledge Sharing
- 30-25 Communications Technology and Person Perception: Distance Makes the Heart Grow Fonder
- 30-26 Empirical Support for a New Approach to Computer-Based Simulation
- 30-28 Effects of Self-Monitoring During Face-to-Face and Online Interviews
- 80 Implementing Web-Based Assessment Programs: Conceptual and Practical Considerations
- 123 Factors Affecting the Success of eHR Systems in Organizations
- 150 Technology Innovations in Human Capital Development
- 233 Cutting-Edge Selection: Turning Applicant Tracking Into Talent Acquisition

Training

- 53 Strategic Approach to On-the-Job Learning: Beyond Trial and Error
- 149 Current Issues in Training Effectiveness
- 153 Learn 'N' Play: Effectiveness of Videogame-Based Simulations for Training and Development
- 166-26 Simulation Training Evaluation for NASA's Mission Management Team
- 177 Theoretical Advancements in E-Learning Research
- 204 Mentoring: Extending Research and Practice to Access Under-Utilized Workforce Populations
- 263-1 Learner Control in a Web-Based Course: Pace Yourself!
- 263-3 Effectiveness of Web-Based Instruction Relative to Classroom Instruction: A Meta-Analysis
- 263-11 Do Strategy and High-Performance Work Practices Predict Training Culture?
- 263-12 Assessing Training Needs: Do Raters' Work Experience and Capability Matter?
- 263-15 Assessing Change in Perceived Organizational Support Due to Training
- 263-17 Examining Knowledge Structure Development and Predictors of Performance
- 263-18 Self-Efficacy, Collaborative Learning, and Complex Skill Acquisition: An Attribute–Treatment Interaction
- 263-19 Sexual Harassment Training: Man Versus Machine
- 263-20 The Comparative Effectiveness of Human Versus Intelligent Agent Training Partners
- 263-21 Modeling the Links Between Need for Cognition and Skill Acquisition
- 263-22 Effects of Training Utility Perceptions and Organizational Support on Transfer
- 263-24 Effects of Pretraining Influences on Static and Dynamic Change Phases
- 263-25 Knowledge Structures and Complex Skill Acquisition: A Replication and Extension

Validation

- 69-6 Relationship of PDI Employment Inventory Scores to Criminal Behaviors
- 69-10 The Changing Nature of Clerical Job Performance: Revisiting Validity Estimates
- 69-14 Differences of SI and BDI: Is it Really Predictive Validity?
- 69-15 An Explication of Statistical Significance Testing Applied to Lawshe's CVR
- 69-16 Understanding the Relationship Between Critical Thinking and Job Performance
- 69-17 Validity of Personality Measures and the Quality of the Criterion
- 124 Validity Generalization at Work: Is it Legal to be Scientific?
- 141-3 Validation of an American Social Self-Efficacy Inventory in Chinese Population
- 263-14 Examination of Big Five Predictive Validity Across Training Performance Criteria

Work and Family

- 49 The Intersection of Work and Family Roles: A Crossover and Dyadic Perspective
- 77 What I-O Psychology Needs to Know About Family Caregiver Discrimination
- 96-28 Work–Family Conflict, Emotions, and Satisfaction: Effects at Work and Home
- 114-6 Advancing Measurement of Work–Family Boundary Management Practices
- 121 Nontraditional, Understudied Populations in Work–Family Research
- 138 Telework and Dependent Care: Is Standard Practice Best Practice?
- 159 Processes Linking Work and Family Domains: Taking a Dynamic Approach
- 195-1 Personality and Separation Anxiety in Employed Mothers
- 195-2 A Longitudinal Study of Faculty Pregnancy Leave Practices: 1995–2005
- 195-3 Effects of Gender Match on Leader–Member Exchange and Work–Family Conflict

-
- 195-4 Work and Home Boundary Management: Testing the Segmentation–Integration Continuum
 - 195-5 Work-Induced Guilt and Conservation of Resources on Satisfaction
 - 195-6 Work–Family Conflict: Work Group Crossover and Work Group Similarity
 - 195-7 International and Multisource Perspectives on Work–Life Balance and Career Derailment
 - 195-8 Pruning of the Work–Family Climate Construct
 - 195-9 Polychronicity as a Mediator of the Multiple Roles–Overload Relationship
 - 195-10 Comparing the Efficacy of Various Work–Family Conflict Measures: A Meta-Analysis
 - 195-11 Correlates of Family-Supportive Benefits: A Meta-Analysis
 - 195-12 Does Autonomy at Work Make You Happy at Home?
 - 195-13 Transitioning Between Work and Family: Why the Commute Matters
 - 195-14 Telework and Work–Family Conflict: The Role of Interruptions and Support
 - 195-15 Assessing Applicant Fit: Combining Individual, Job, and Organizational Characteristics
 - 195-16 Actual–Desired Time Discrepancies in Work, Family, and Personal Domains
 - 195-17 Individual Differences and Perceived Organizational Support: Predictors of Work–School Conflict
 - 195-18 A Review of Several Measurement Issues in Work–Family Conflict Research
 - 195-19 Air Force Deployment Reintegration Research: A Qualitative Study
 - 195-20 Effects of Work Schedule Fit: A Test of Competing Hypotheses
 - 195-21 Continuing the Investigation Into Personality Traits and Work–Family Conflict
 - 195-22 Commitment and Work–Family Interface: Predictions from Socioemotional Selectivity Theory
 - 195-23 Examining Mediators of the Telework/Work–Family Conflict Relationship
 - 195-24 It's Not Just About Sex: Gender-Specific Roles Predict Work–Family Conflict
 - 195-25 A Qualitative Investigation of the Nature of Workaholism
 - 195-26 Family-Supportive Supervisors and the Use of Family-Friendly Benefits
 - 212 Work–Life Balance in Corporations: Theoretical, Legal, and Applied Perspectives

Work Groups/Teams and Group Processes

- 28-2 The Effect of Trust and Information Sharing on Team Performance
- 98 Team Adaptation to Environmental Forces: Current Research and Theory
- 166-1 Understanding the Existence of Groups: Developing a Measure of Entitativity
- 166-4 Improving the Launch of Self-Managed Teams With a Process Intervention
- 166-5 Explicit Coordination and Declarative Commitment in Leaderless Project Team Communication
- 166-6 The Effects of Multiple Emergent Leaders on Team Performance
- 166-9 Evaluating Shared Mental Model Measurement
- 166-10 Reflexivity, Development of Shared Task Representations, and Group Decision Making
- 166-11 A Meta-Analytic Examination of Information Sharing in Work Teams
- 166-12 Learning From Errors: The Case of Medication Administration
- 166-13 Global Virtual Teams: A Review and Proposed Research Agenda
- 166-14 Partner and Personal Information Interaction Effects on Team Member Outcomes
- 166-15 Group Attachment and the Big Five Predicting Group Tightness
- 166-16 The Impact of Personality and Value Diversity on Team Performance
- 166-19 Collective Efficacy Formation: A Field Study in China
- 166-20 Effects of Emotional Stability and Feedback on Work Group Performance
- 166-22 Multiple-Perspective Taking in Team-Member Exchange in a Virtual Environment
- 166-23 The Effects of Feedback and Leadership on Virtual Team Performance
- 166-24 Composition of Teams and Computer-Based Tasks: Effects of Gender
- 166-25 Virtual Teams: The Application of Critical Thinking Interventions
- 166-27 Perceived Organizational Support and Work Group Processes
- 243-1 Personality Antecedents to Virtual Team Member Performance
- 243-3 Influence of Beliefs About Team Personality on Team Performance Ratings
- 243-4 Conscientiousness and Creative Task Performance: Does Thinking Style Matter?

Program Participants (listed by session; numbers following hyphens are posters.)

Aafaqi, Rehana.....262-1	Aselage, Justin116, 166-27	Bedell, Katrina E.....20, 61, 104-4, 139-4	Boatman, Paul R. ..263-18, 263- 21, 263-25
